TABLE OF CONTENTS.

[See Alphabetical Index, at end of Part I.]

PART I.

	Page.
LETTER OF TRANSMITTAL	xiii
INTRODUCTION	xv
APPENDIX A	xvii–xxv
An act to provide for the taking of the Tenth and subsequent censuses	xvii
An act to amend an act entitled "An act to provide for the taking of the Tenth and subsequent censuses"	xxiv
APPENDIX B	xxvi–liii
Reports of the Superintendent of Census to the Secretary of the Interior	xxvi, lii
APPENDIX C	liv–lxxvi
Documents relating to the taking of the census of South Carolina	liv–lxxvi

POPULATION.

STATISTICS OF POPULATION	1–648
Table I.—Population of the United States, in the aggregate, and by sex, nativity, and race	2, 3
II.—Aggregate population at each census of each state or territory as constituted at the date of that census	4, 5
III.—Percentage of increase of population	6
IV.—Density of population	7
V.—The urban population of the United States: 1790 to 1880	8
The center of population in 1880	8
VI.—Distribution of population by drainage basins	9, 10
VII.—Distribution of population in elevation above sea-level	10
VIII.—Distribution of population in accordance with topographical features	10
IX.—Distribution of population in accordance with the mean annual temperature	11
X.—Distribution of population in accordance with the mean temperature of July	11
XI.—Distribution of population in accordance with the mean temperature of January	11
XII.—Distribution of population in accordance with the maximum temperature	11
XIII.—Distribution of population in accordance with the minimum temperature	12
XIV.—Distribution of population in accordance with the annual rainfall	12
XV.—Distribution of population in accordance with rainfall of the spring and summer	12
XVI.—Distribution of population in latitude	12, 13
XVII.—Distribution of population in longitude	13
XVIII.—Aggregate population by counties: 1880, 1870, 1860	14–60
XIX.—Population of minor civil divisions	61–331
XX.—Population as native and foreign-born: 1880, 1870, 1860	332
XXI.—White and colored population: 1880, 1870, 1860	333
XXII.—Chinese, Japanese, and civilized Indians: 1880, 1870, 1860	334
XXIII.—Population by race and by counties: 1880, 1870, 1860	335–379

Table. Page.

XXIV.—Population of cities and towns of 4,000 inhabitants and upward, by race: 1880 and 1870 380–405
XXV.—Population by nativity and by counties: 1880, 1870, 1860 406–451
XXVI.—Population of places of 4,000 inhabitants and over, by nativity: 1880 and 1870 452–463
XXVII.—Native population of the United States, distributed according to state or territory of birth: 1880 464–469
XXVIII.—Native white population of the United States, distributed according to state or territory of birth: 1880 470–475
XXIX.—Native colored population of the United States, distributed according to state or territory of birth: 1880 476–481
XXX.—Showing the nativities of foreign-born population in the United States, and in each state and territory: 1880 482–487
XXXI.—Native and foreign population, distributed according to place of birth among certain specified states of the United States and foreign countries: 1880 488–541
XXXII.—Native population of fifty principal cities, distributed according to states and territories of birth: 1880 542–545
XXXIII.—The foreign-born population of fifty principal cities, distributed according to place of birth, among the various foreign countries: 1880 546–551
XXXIV.—Sex of the aggregate population, with general nativity: 1880 ..... 552, 553
XXXV.—Sex of the white population, with general nativity: 1880 ..... 554, 555
XXXVI.—Sex of the colored population, with general nativity: 1880 556
XXXVII.—Sex of the Chinese and Japanese population, with general nativity: 1880 557
XXXVIII.—Sex of the civilized Indian population, with general nativity: 1880 558
XXXIX.—The natural militia, with the total male population: 1880 559
XL.—Male population and males of voting age: 1880 560
XLI.—School, military, and citizenship ages, with sex for the school age and for all ages, by counties: 1880 561–606
XLII.—Ages of the population, as returned at the Tenth Census: 1880 607–648
A—Aggregate 607–612
B—Native white males 613–618
C—Native white females 619–624
D—Foreign-born white males 625–630
E—Foreign-born white females 631–636
F—Colored males (including Chinese, Japanese, and Indians) 637–642
G—Colored females (including Chinese, Japanese, and Indians) 643–648

AGRICULTURE.

STATISTICS OF AGRICULTURE 649–923
XLIII.—General statistics of agriculture by states and territories at the censuses of 1880, 1870, 1860, and 1850 650–683
XLIV.—Summary, by states and territories, of the number of farms, the acres of improved land, and farm values 684, 685
XLV.—Farm areas and farm values: 1880 686–737
XLVI.—Summary, by states and territories, of the principal vegetable productions: 1880 738–741
XLVII.—Principal vegetable productions, by counties: 1880 742–831
XLVIII.—Summary, by states and territories, of live stock and its productions: 1880 ..... 832, 833
XLIX.—Live stock and its productions, by counties: 1880 834–923

PART II.

MANUFACTURES.

Table.		Page.
	STATISTICS OF MANUFACTURES	925–1211
	Remarks on the statistics of manufactures	926, 927
L.	—Manufactures, by totals, of states and territories for the censuses of 1880, 1870, 1860, and 1850	928–931
LI.	—The United States by specified industries: 1880	932–943
LII.	—Manufactures in each state and territory: 1880	944–1029
LIII.	—Manufactures of 20 principal cities: 1880	1030–1097
	Baltimore	1030–1033
	Boston	1034–1039
	Brooklyn	1038–1043
	Buffalo	1042–1045
	Chicago	1046–1051
	Cincinnati	1050–1055
	Cleveland	1054–1057
	Detroit	1058, 1059
	Jersey City	1060, 1061
	Louisville	1060–1063
	Milwaukee	1064, 1065
	Newark	1066–1069
	New Orleans	1068–1071
	New York	1070–1077
	Philadelphia	1076–1083
	Pittsburgh	1082–1085
	Providence	1084–1087
	Saint Louis	1088–1091
	San Francisco	1092–1095
	Washington	1096, 1097
LIV.	—Special statistics for principal industries: 1880	1098–1211
	Agricultural implements	1098–1103
	Boots and shoes (factory industry)	1104, 1105
	Brick and tile	1106, 1107
	Carpets	1108, 1109
	Cheese and butter	1110–1113
	Chemical products	1114–1123
	Coke	1208, 1209
	Cotton manufactures: specific products of cotton	1124–1127
	other mills	1124
	Dyeing and finishing textiles	1128, 1129
	Felt goods	1128, 1129
	Flouring- and grist-mill products	1130, 1131
	Glass	1208–1211
	Hosiery and knit goods	1132–1135
	Iron and steel	1136–1157
	A—Aggregate of manufacture, by states	1136, 1137
	B—Blast furnaces	1138–1141
	C—Bloomaries and forges	1142, 1143
	D—Iron rolling-mills	1144–1151
	E—Bessemer and open-hearth steel works	1152–1155
	F—Crucible and miscellaneous steel works	1156, 1157
	Leather, curried	1158, 1159
	tanned	1160, 1161

Table. Page.

LIV.—Special statistics for principal industries: 1880—continued.
Lumber, sawed 1162, 1163
Mixed textiles 1164, 1165
Paper (not including wood pulp, leather board, etc.). 1166–1169
Petroleum (see *Mining*).
Salt 1170, 1171
ground 1170, 1171
Shipbuilding 1172–1183
A—Aggregate 1172, 1173
B—New vessels 1174, 1175
C—Repairing of vessels 1176, 1177
D—Boats 1178, 1179
E—Ocean, coast, and river vessels 1180, 1181
F—Northern lakes 1182, 1183
G—Western rivers 1182, 1183
H—Canal boats 1182, 1183
I—Iron vessels 1182, 1183
Silk and silk goods 1184, 1185
Slaughtering and meat-packing 1186–1189
Woolen goods 1190–1201
Wool hats 1202, 1203
Worsted goods 1204–1207

POWER USED IN MANUFACTURES.

STATISTICS OF POWER USED IN MANUFACTURES 1213–1226
Letter of transmittal 1215–1218
LV.—Power used in manufactures in the United States: 1880 1219
LVI.—Power used in manufactures in the United States in certain industries: 1880 1220–1226

MINING.

PRECIOUS METALS 1229–1236
LVII.—Gold and silver product of the United States for the year ending May 31, 1880 ..... 1230, 1231
LVIII.—Production of precious metals by geographical divisions 1232
LIX.—Percentage of placer gold and gold from deep mines in total gold product 1233
LX.—Relative production of precious metals in the states and territories 1233
LXI.—Average product of gold and silver, per capita and per square mile 1234
LXII.—Rank of the states and territories in production of the precious metals 1235
LXIII.—Production of precious metals unaccounted for in preceding tables 1236
NON-PRECIOUS MINERALS 1237–1243
LXIV.—Condensed statement of mineral production of regular mining establishments of non-precious minerals, by substances 1237
LXV.—Averages applicable to mineral products from regular establishments from censuses of 1870 and 1880 in the United States 1239
LXVI.—Percentage of gain per ton in mineral products in the United States since the census of 1870 1240
LXVII.—Product of the non-precious minerals, by substances and by states: 1880 ..... 1242, 1243

Table. Page.
LXVIII.—The mineral products, by certain industrial fields: 1880 ..... 1242, 1243
QUARRIES 1244–1247
LXIX.—General statistics of the quarrying industries of the United States: 1880 ..... 1244, 1245
LXX.—Statistics of the quarrying industries of the United States, showing number of quarries and production, by kinds of rock and by states and territories: 1880 ..... 1246, 1247
PETROLEUM 1248–1253
LXXI.—Statistics of the investment of capital and the employment of labor in the production of petroleum during the year ending May 31, 1880 ..... 1251, 1252
LXXII.—Statistics of petroleum refining: 1880 ..... 1252, 1253

RAILROADS, STEAM CRAFT, CANALS, TELEGRAPHS, AND TELEPHONES.

RAILROADS 1257–1267
LXXIII.—Physical characteristics—miles of railroad up to June 30, 1880. 1257
LXXIV.—Averages (cost, value, and amounts), per mile of road completed and operated, of assets and liabilities; earnings, income, expenses, profit, dividends, and balance retained. 1258
LXXV.—Aggregate income 1258
LXXVI.—Income by groups 1259
LXXVII.—Aggregate assets and liabilities 1259, 1260
LXXVIII.—Aggregate transportation earnings 1260
LXXIX.—Aggregate transportation expenses 1260, 1261
LXXX.—Results of traffic operations, by groups 1261
LXXXI.—Per cent. of profit upon capital stock (paid in) of companies which report net income available to the payments of dividends 1262, 1263
LXXXII.—Condensed statement of per cent. of profit upon capital stock. 1263
LXXXIII.—Capital stock paid in 1263
LXXXIV.—Net income available to dividends upon capital stock 1264
LXXXV.—Tonnage: Classification of articles carried 1265
LXXXVI.—Accidents on railroads 1267
STEAM CRAFT 1268–1301
LXXXVII.—Statement of the total number, tonnage, value, capital invested, service, and traffic of the steam craft of the United States for 1880 1268–1271
LXXXVIII.—Statement of the number, tonnage, value, capital invested, service, and traffic of the steam craft on United States waters, by groups: 1880 1270–1275
LXXXIX.—Statement of the number, tonnage, value, capital invested, service, and traffic of the steam craft, by states: 1880 1276–1297
XC.—Statement of the approximate number, tonnage, and value of the steamers, sailing vessels, canal-boats, barges, flats, and wharf-boats of the United States for 1880 1298–1300
XCI.—Statement of the number and tonnage of steam vessels of the United States navy, revenue marine, light-house board, etc. 1301
CANALS 1302–1309
XCII.—Statement of the canals operated by states and corporations in the United States: 1880 1302–1307
XCIII.—Statement of the length and recorded cost of construction of all the important abandoned canals in the United States. 1308, 1309

Table. Page.

TELEGRAPHS 1310–1325
XCIV.—General financial exhibit for the year: 1880 1310–1315
XCV.—Balance sheet: 1880 1316–1319
XCVI.—Capital stock: 1880 ..... 1320, 1321
XCVII.—Service account: 1880 1322–1325
TELEPHONES 1327–1340
XCVIII.—General financial exhibit: 1880 1328–1333
XCIX.—Balance sheet, etc.. 1880 1332–1337
C.—Service account: 1880 1338–1340

OCCUPATIONS.

STATISTICS OF OCCUPATIONS 1341–1399
CI.—Number and sex of persons engaged in each class, by states and territories: 1880 ..... 1356, 1357
CII.—Persons engaged in all classes of occupations, by states and territories, with age, sex, and nativity: 1880 1358–1367
Persons engaged in agriculture 1360, 1361
Persons engaged in professional and personal services 1362, 1363
Persons engaged in trade and transportation 1364, 1365
Persons engaged in manufactures, mechanical, and mining industries 1366, 1367
CIII.—The United States by classes and severally, with the age, sex, and nativity of persons occupied: 1880 1368–1377
CIV.—Number of persons engaged in the principal (selected) occupations, by states and territories: 1880 1378–1389
CV.—Fifty cities: 1880 1390–1399
Persons engaged in all classes of occupations, with age, sex, and nativity 1390, 1391
Persons engaged in agriculture, with age, sex, and nativity 1392, 1393
Persons engaged in professional and personal services, with age, sex, and nativity 1394, 1395
Persons engaged in trade and transportation, with age, sex, and nativity 1396, 1397
Persons engaged in manufacturing, mechanical, and mining industries, with age, sex, and nativity 1398, 1399

FISHERIES.

CVI.—Statistics of the fisheries of the United States: 1880 ..... 1402, 1403

FOREIGN PARENTAGE.

STATISTICS OF FOREIGN PARENTAGE 1405–1409
CVII.—Parentage of the total number of persons in the United States having one or both parents foreign born; also, number of foreign-born persons having both parents native born. 1408, 1409

AREAS, DWELLINGS, AND FAMILIES.

STATISTICS OF AREAS, DWELLINGS, AND FAMILIES 1411–1417
CVIII.—Areas, dwellings, and families: 1880 1413–1415
A—Areas, land surface 1413
B—Dwellings 1414
C—Families 1415
CIX.—Dwellings, families, and population in 100 principal cities: 1880 ..... 1416, 1417

ALASKA.

Table. Page.

STATISTICS OF ALASKA 1419–1429
Letter of transmittal 1421, 1422
CX.—Statistics of the population of Alaska 1422–1429
Arctic division 1422, 1423
Yukon division 1423, 1424
Kuskokvim division 1425, 1426
Aleutian division 1426
Kadiak division 1427
Southeastern division 1428, 1429
Recapitulation 1429

LIFE INSURANCE.

STATISTICS OF LIFE INSURANCE 1431–1454
CXI.—Statement of the capital stock of all life insurance companies in the United States 1432, 1433
CXII.—Exhibit of the financial condition of life insurance companies during the year ending December 31, 1879—INCOME 1434–1437
CXIII.—Exhibit of the financial transactions of life insurance companies during the year ending December 31, 1879—DISBURSEMENTS 1438–1443
CXIV.—Exhibit of the financial condition of life insurance companies during the year ending December 31, 1879—ASSETS 1444–1449
CXV.—Exhibit of the financial condition of life insurance companies during the year ending December 31, 1879—LIABILITIES. 1450–1453
CXVI.—Number of policies and amount of insurance written and terminated in 1879, and number of policies and amount of insurance in force December 31, 1879 1454

FIRE AND MARINE INSURANCE.

STATISTICS OF FIRE AND MARINE INSURANCE 1455–1505
Letter of transmittal 1456, 1457
CXVII.—Classification and capital stock of fire, fire-marine, and marine insurance companies 1458–1463
CXVIII.—Assets of fire, fire-marine, and marine insurance companies, December 31, 1879 1464–1469
CXIX.—Liabilities of fire, fire-marine, and marine insurance companies, December 31, 1879 1470–1475
CXX.—Income and expenditure of fire, fire-marine, and marine insurance companies during the year 1879 1476–1481
CXXI.—Surpluses and deficiencies of fire, fire-marine, and marine insurance companies, December 31, 1879 1482–1487
CXXII.—Risks written, and risks in force, of fire, fire-marine, and marine insurance companies 1488–1493
CXXIII.—Ratios of the business of fire, fire-marine, and marine insurance companies for the year 1879 1494–1505

VALUATION AND TAXATION.

STATISTICS OF VALUATION AND TAXATION 1507–1565
CXXIV.—Summary of the assessed valuation, and state, county, city, etc., taxation, by states and geographical groups: 1880 .. 1508, 1509
CXXV.—Assessed valuation, and state, county, city, etc., taxation, by counties 1510–1565

PUBLIC INDEBTEDNESS.

Table.		Page.
	STATISTICS OF PUBLIC INDEBTEDNESS	1567–1626
	Debt of the United States	1569
CXXVI.	—Exhibit showing the number of holders of United States registered bonds in the various states	1569
CXXVII.	—Exhibit showing the amounts of United States registered bonds held by individuals in the various states, and by banks, etc	1569
CXXVIII.	—Analysis of the combined bonded debts of states and territories, counties, townships, towns, cities, boroughs, villages, and school districts	1570
CXXIX.	—Debts of states, territories, counties, cities, towns, etc	1571, 1572
CXXX.	—Debts of states, territories, counties, cities, towns, etc., with local debt, by counties	1572–1626

NEWSPAPERS AND PERIODICALS.

	STATISTICS OF NEWSPAPERS AND PERIODICALS	1627–1631
CXXXI.	—Statement showing the total number of newspapers and periodicals published in the United States during the census year, by periods of issue	1628
CXXXII.	—Statement showing the classification of newspapers and periodicals published in the United States during the census year	1629
CXXXIII.	—Statement showing the number and language of all newspapers and periodicals published in the United States during the census years	1630
CXXXIV.	—Statement showing the total number of newspapers and periodicals devoted to religion, by denominations, published in the United States	1631

PUBLIC SCHOOLS.

	STATISTICS OF PUBLIC SCHOOLS	1633–1641
	Letter of transmittal	1635–1637
CXXXV.	—Public schools, elementary and high, by states and territories, showing whole number; number of separate schools for colored children; number reported as high schools, or having high-school departments; number of school buildings and sittings; value of school property; receipts and expenditures: 1880	1638, 1639
CXXXVI.	—Public schools, elementary and high, by states and territories, showing number of teachers employed at one time, by color and sex; average amount paid monthly for teachers' services and aggregate months of same; aggregate months of schools, number of pupils by color and sex, and average daily attendance: 1880	1640, 1641

ILLITERACY.

	STATISTICS OF ILLITERACY	1643–1656
CXXXVII.	—Illiteracy, by states and territories, at the censuses of 1880, 1870, and 1860	1645–1656

DEFECTIVE, DEPENDENT, AND DELINQUENT CLASSES.

Table.		Page.
	STATISTICS OF DEFECTIVE, DEPENDENT, AND DELINQUENT CLASSES	1657–1701
	Letter of transmittal	1659–1670
	The afflicted	1659
	Pauperism	1666
	Prisoners	1667
CXXXVIII.	—The insane, by sex, nativity, and race: 1880	1671
CXXXIX.	—The idiotic, by sex, nativity, and race: 1880	1672
CXL.	—The blind, by sex, nativity, and race: 1880	1673
CXLI.	—The deaf-mutes, by sex, nativity, and race: 1880	1674
CXLII.	—Paupers, by sex, nativity, and race: 1880	1675
CXLIII.	—Prisoners, by sex, nativity, and race: 1880	1676
CXLIV.	—The number of insane, idiotic, blind, and deaf-mutes, by sex, nativity, and race, reported at each census since 1850	1677
CXLV.	—The insane classified according to places where found: 1880	1678
CXLVI.	—Insane in hospitals and asylums for the same, by sex, nativity, and race: 1880	1679–1682
CXLVII.	—Idiots in hospitals and asylums for the insane, by sex, nativity, and race: 1880	1683–1685
CXLVIII.	—Idiots in training schools for the feeble-minded, by sex, nativity and race: 1880	1686
CXLIX.	—Idiots classified according to places where found: 1880	1687
CL.	—The blind in institutions for the same, by sex, nativity, and race: 1880	1688, 1689
CLI.	—The deaf-mutes in institutions for the same, by sex, nativity, and race: 1880	1690–1692
CLII.	—Prisoners classified according to places where found: 1880	1693
CLIII.	—Prisoners in penitentiaries, by sex, nativity, and race: 1880	1694–1696
CLIV.	—Inmates of reformatories, by sex, nativity, and race: 1880	1697–1699
CLV.	—Prisoners in workhouses and houses of correction, by sex, nativity, and race: 1880	1700, 1701
CLVI.	—Summary, showing the number and location of the defective, dependent, and delinquent classes, on June 1, 1880 (exclusive of homeless children)	1702

MORTALITY.

	STATISTICS OF MORTALITY	1703–1731
	Remarks on mortality statistics	1705–1725
CLVII.	—Deaths in the United States, by states and state groups, with distinction of sex and certain specified ages	1726–1728
CLVIII.	—Deaths in the United States, by states and state groups, from ten principal causes	1729–1731

INDEX.

LETTER OF TRANSMITTAL.

DEPARTMENT OF THE INTERIOR,

CENSUS OFFICE,

Washington, D. C., January 6, 1883.

HON. H. M. TELLER,

Secretary of the Interior.

SIR: I have the honor to transmit herewith the statistical tables, with accompanying descriptive and explanatory matter, notes, etc., which have been prepared as a Compendium of the Tenth Census of the United States.

Very respectfully, your obedient servant,

C. W. SEATON,

Superintendent of Census.

INTRODUCTION.

The following pages contain the condensed results of the Tenth Census of the United States, taken as of date June 1, 1880, under authority of the acts approved March 3, 1879, and April 20, 1880, which will be found appended (pages xvii–xxv).

By this act the scope of the census was greatly enlarged, and its machinery was changed in several marked particulars from that provided by the act of May 23, 1850, under which the Seventh, Eighth, and Ninth Censuses were necessarily taken. The scope of these changes, and the result of the application of the new methods, will be found in the reports of the Superintendent of the Census for the years 1879 to 1882, the substantive parts of which are appended as constituting the history of the Tenth Census. It will not surprise the reader that, in the prosecution of a work of this magnitude, more than one disappointment should have been experienced as to both the time and the money required for its successful completion.

Except only as to churches, libraries, and private schools, the statistics of which have been delayed in compilation, the tables embraced in this publication touch all the general classes of statistics which will be embraced in the much more extended publication of the series of quarto volumes authorized by act of the present Congress. These quarto volumes will, however, contain a vast amount of more local, more detailed, or more technical information of a predominantly statistical character, for which room could not be found in the present publication.

APPENDIX A.

PUBLIC ACTS.

AN ACT to provide for the taking of the Tenth and subsequent censuses.

[PUBLIC—No. 98.]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That a census of the population, wealth, and industry of the United States shall be taken on or for the date June first, eighteen hundred and eighty.

SEC. 2. That there shall be established in the Department of the Interior an office to be denominated the Census Office, the chief officer of which shall be called the Superintendent of the Census, whose duty it shall be, under the direction of the head of the department, to superintend and direct the taking of the Tenth Census of the United States, in accordance with the laws relating thereto, and to perform such other duties as may be required of him by law.

SEC. 3. The Superintendent of Census shall be appointed by the President, by and with the advice and consent of the Senate; and he shall receive an annual salary of five thousand dollars; and the Secretary of the Interior may appoint a chief clerk of the Census Office, six clerks of class four, ten clerks of class three, fifteen clerks of class two, with such number of clerks of class one, and of copyists and computers at salaries of not less than seven hundred dollars or more than one thousand dollars, as may be found necessary for the proper and prompt compilation and publication of the results of the enumeration of the census herein provided to be taken. And upon such compilation and publication of said census, said office of Superintendent shall cease, and the period of service of said clerks shall end.

SEC. 4. The Secretary of the Interior shall, on or before the first day of March, eighteen hundred and eighty, designate the number, whether one or more, of supervisors of census, to be appointed within each state or territory, who shall be residents of the state or territory. The supervisors shall be appointed by the President of the United States, by and with the advice and consent of the Senate. The total number of such supervisors shall not exceed one hundred and fifty. The Superintendent and the supervisors shall, before entering upon the duties of their offices, respectively, take and subscribe the following oath or affirmation:

I, ——— ——— (Superintendent or supervisor, as the case may be), do solemnly swear or affirm that I will support the Constitution of the United States, and perform and discharge the duties of the office of (Superintendent or supervisor, as the case may be), according to law, honestly and correctly, to the best of my ability.

Which oaths shall be filed in the office of the Secretary of the Interior.

SEC. 5. Each supervisor of census shall be charged with the performance, within his own district, of the following duties: To propose to the Superintendent of Census the apportionment of his district into subdivisions most convenient for the purpose of enumeration; To designate to the Superintendent of Census suitable persons, and, with the consent of said Superintendent, to employ such persons as enumerators within his district, one for each subdivision, and resident therein, who shall be selected solely with reference to their fitness, and without reference to their political or party affiliations, according to the apportionment approved by the Superintendent of Census; To transmit to enumerators the printed forms and schedules issued from the Census Office, in quantities suited

to the requirements of each subdivision; To communicate to enumerators the necessary instructions and directions relating to their duties, and to the methods of conducting the census, and to advise with and counsel enumerators in person and by letter, as freely and fully as may be required to secure the purposes of this act; and under the direction of the Superintendent of Census, and to facilitate the taking of the census with as little delay as possible, he may cause to be distributed by the enumerators, prior to the taking of the enumeration, schedules to be filled up by householders and others; To provide for the early and safe transmission to his office of the returns of enumerators, embracing all the schedules filled by them in the course of enumeration, and for the due receipt and custody of such returns pending their transmission to the Census Office; To examine and scrutinize the returns of enumerators, in order to ascertain whether the work has been performed in all respects in compliance with the provisions of law, and whether any town or village or integral portion of the district has been omitted from enumeration; To forward to the Superintendent of Census the completed returns of his district in such time and manner as shall be prescribed by the said Superintendent, and in the event of discrepancies or deficiencies appearing in the returns from his district, to use all diligence in causing the same to be corrected or supplied; To make up and forward to the Superintendent of Census the accounts required for ascertaining the amount of compensation due under the provisions of this act to each enumerator of his district.

SEC. 6. Each supervisor of census shall, upon the completion of his duties to the satisfaction of the Secretary of the Interior, receive the sum of five hundred dollars in full compensation for all services rendered and expenses incurred by him, except an allowance for clerk hire may be made, at the discretion of the Superintendent of Census.

SEC. 7. No enumerator shall be deemed qualified to enter upon his duties until he has received from the supervisor of census of the district to which he belongs a commission, under his hand, authorizing him to perform the duties of an enumerator, and setting forth the boundaries of the subdivision within which such duties are to be performed by him. He shall, moreover, take and subscribe the following oath or affirmation:

I, ——— ———, an enumerator for taking the ——— census of the United States, do solemnly swear (or affirm) that I will make a true and exact enumeration of all the inhabitants within the subdivision assigned to me, and will also faithfully collect all other statistics therein, as provided for in the act for taking the ——— census, and in conformity with all lawful instructions which I may receive, and will make due and correct returns thereof as required by said act, and will not disclose any information contained in the schedules, lists, or statements obtained by me to any person or persons, except to my superior officers.

(Signed) ——— ———.

Which said oath or affirmation may be administered by any judge of a court of record, or any justice of the peace empowered to administer oaths; and a copy thereof, duly authenticated, shall be forwarded to the supervisor of census before the date fixed herein for the commencement of the enumeration.

SEC. 8. It shall be the duty of each enumerator, after being qualified in the manner aforesaid, to visit personally each dwelling-house in his subdivision, and each family therein, and each individual living out of a family in any place of abode, and by inquiry made of the head of such family, or of the member thereof deemed most credible and worthy of trust, or of such individual living out of a family, to obtain each and every item of information and all the particulars required by this act, as of date June first, eighteen hundred and eighty. And in case no person shall be found at the usual place of abode of such family or individual living out of a family competent to answer the inquiries made in compliance with the requirements of this act, then it shall be lawful for the enumerator to obtain the required information, as nearly as may be practicable, from the family or families, or person or persons, living nearest to such place of abode: *Provided*, That Indians not taxed shall be omitted from the enumeration; but the Superintendent of Census may employ special agents

or other means to make an enumeration of all Indians not taxed, within the jurisdiction of the United States, with such information as to their condition as may be obtainable.

SEC. 9. And it shall be further the duty of each enumerator to forward the original schedules, duly certified, to the supervisor of census of his district, as his returns under the provisions of this act.

SEC. 10. The compensation of enumerators shall be ascertained and fixed as follows: In subdivisions where the Superintendent of Census shall deem such an allowance sufficient, an allowance not exceeding two cents for each living inhabitant, two cents for each death reported, ten cents for each farm, and fifteen cents for each establishment of productive industry enumerated and returned, may be given in full compensation for all services; and no claim for mileage or traveling expenses shall be allowed in such subdivisions: *Provided*, That the subdivisions to which the above rate of compensation shall apply must be designated by the Superintendent of Census at least one month in advance of the enumeration; and no account of the time occupied in enumeration shall be required for the purpose of ascertaining and determining the compensation of enumerators in such subdivisions. For all other subdivisions, rates of compensation shall be fixed in advance of the enumeration by the Superintendent of Census, with the approval of the Secretary of the Interior, according to the difficulty of enumeration, having reference to the nature of the region to be canvassed, and the density or sparseness of settlement, or other considerations pertinent thereto; but the compensation allowed to any enumerator in any district east of the one hundredth meridian shall not exceed an average of four dollars per day of ten hours actual field-work each; and the compensation allowed to any enumerator in any district west of the one hundredth meridian shall not exceed six dollars per working day of equal length. And the Superintendent of Census may prescribe a uniform method and suitable forms for keeping account of the time occupied in field-work, for the purpose of ascertaining the amounts due to enumerators, severally, under the provisions of this act.

SEC. 11. The subdivision assigned to any enumerator shall not exceed four thousand inhabitants, according to the census of eighteen hundred and seventy: *Provided*, That in the territories and in the states admitted into the Union since eighteen hundred and seventy, the supervisors of census may appoint additional enumerators in cases where, in his judgment, the census cannot be properly taken in thirty days by reason of the increase of population or the physical features of the said district. The boundaries of all subdivisions shall be clearly described by civil divisions, rivers, roads, public surveys, or other easily distinguished lines.

SEC. 12. That any supervisor or enumerator, who, having taken and subscribed the oath required by this act, shall, without justifiable cause, neglect or refuse to perform the duties enjoined on him by this act, or shall, without the authority of the Superintendent, communicate to any person not authorized to receive the same, any statistics of property or business included in his return, shall be deemed guilty of a misdemeanor, and upon conviction shall forfeit a sum not exceeding five hundred dollars; or, if he shall willfully and knowingly swear or affirm falsely, he shall be deemed guilty of perjury, and, on conviction thereof, shall be imprisoned not exceeding three years, or by fine not exceeding eight hundred dollars; or, if he shall willfully and knowingly make false certificates or fictitious returns, he shall be deemed guilty of a misdemeanor, and, upon conviction of either of the last named offenses, he shall forfeit and pay a sum not exceeding five thousand dollars and be imprisoned not exceeding two years.

SEC. 13. That if any person shall receive or secure to himself any fee, reward, or compensation as a consideration for the employment of any person as enumerator or clerk, or shall in any way receive or secure to himself any part of the compensation provided in this act for the services of any enumerator or clerk, he shall be deemed guilty of a misdemeanor, and, on conviction thereof, shall be fined not less than five hundred dollars nor more than three thousand dollars, in the discretion of the court.

SEC. 14. That each and every person more than twenty years of age, belonging to any family residing in any enumeration district, and in case of the absence of the heads and other members of any such family, then any agent of such family, shall be, and each of them hereby is, required, if thereto requested by the Superintendent, supervisor, or enumerator to render a true account to the best of his or her knowledge, of every person belonging to such family, in the various particulars required by law, and whoever shall willfully fail or refuse shall be guilty of a misdemeanor, and upon conviction thereof shall forfeit and pay a sum not exceeding one hundred dollars. And every president, treasurer, secretary, general agent, or managing director of every corporation from which answers to any of the schedules provided for by this act are herein required, who shall, if thereto requested by the Superintendent, supervisor or enumerator, willfully neglect or refuse to give true and complete answers to any inquiries authorized by this act, such officer or agent shall forfeit and pay a sum not less than five hundred dollars, nor more than ten thousand dollars, to be recovered in an action of debt in any court of competent jurisdiction, in the name and to the use of the United States, and in addition thereto shall be guilty of a misdemeanor, and on conviction thereof shall be imprisoned for a term not exceeding one year.

SEC. 15. That all fines and penalties imposed by this act may be enforced by indictment or appropriate action at law in any court of competent jurisdiction where such offenses shall have been committed or forfeitures incurred.

SEC. 16. That the Superintendent, his chief clerk, supervisors, and enumerators are hereby authorized to transmit through the post-office any paper or document relating to the census, by writing thereon "Official business—Census", and subscribing the same, with the addition to his name of his official title. But this privilege shall extend to nothing but documents and papers relating to the census, which shall pass free. And any Superintendent, supervisor, enumerator, or clerk who shall use or exercise this privilege for any purpose other than the legitimate discharge of the duties of his office, shall be deemed guilty of a misdemeanor, and upon conviction shall forfeit for each offense a sum not exceeding one hundred dollars.

SEC. 17. The schedules of inquiries at the Tenth Census shall be the same as those contained in section number twenty-two hundred and six of the Revised Statutes of the United States, of eighteen hundred and seventy-eight, with the following exceptions, to wit:

Schedule number one shall contain inquiries as to the relation of each person enumerated to the head of the family, whether wife, son, daughter, servant, boarder, or other; as to the civil conditions of each person enumerated, whether married, widowed, or single; as to the place of birth of the parents of each person enumerated; as to all foreign-born, whether alien or naturalized persons; and as to the physical and mental health of each person enumerated whether active or disabled, maimed, crippled, bed-ridden, deaf, dumb, blind, insane, or idiotic, and whether employed or unemployed, and if unemployed during what portion of the year. From the same schedule the inquiries as to the value of real and personal estate owned shall be stricken out.

To schedule number two, the Superintendent of the Census may, with the approval of the Secretary of the Interior, add inquiries relating to the acreage of the several crops reported; and, with a like approval, may drop from the schedule such of the minor crops as it may be deemed expedient to omit from the enumeration.

Schedule number three shall contain inquiries respecting the kind and amount of power employed in establishments of productive industry, and the kind and number of machines in use, together with the maximum capacity of such establishment, where the Superintendent of Census shall deem such inquiry appropriate; and the said Superintendent may, when he shall regard it expedient, prepare special blank forms for separate industries.

Schedule number four shall contain inquiries relating to the public indebtedness of cities, counties, incorporated villages, and towns, and school districts; and of the ownership of the public debt of the United States, by whom owned and the respect-

ive amounts; and such additional inquiries respecting the same, as well as respecting the public paupers and criminals, as the Superintendent of Census shall deem necessary to secure full information respecting the numbers and condition of these classes.

Schedule number five shall contain inquiries as to the birthplace of the father and mother of each person reported as having died during the year, and as to the usual occupation of each such person.

The Superintendent of Census shall require and obtain from every railroad corporation, or the lessee or receiver thereof, the following facts, to exhibit the condition of such corporation, and the condition, characteristics, and operations of the railroad or railroads owned or controlled by such corporation, or the lessee or receiver thereof, on the first of June of the year eighteen hundred and eighty, to wit: The name of the corporation or company, with the corporate names of all leased lines; the number of miles projected or authorized by law or charter, with the several terminal points of the same; the number of miles completed, exhibiting separately the length of lines within each State; the number of miles operated during the last complete fiscal year preceding June first, eighteen hundred and eighty; the capital stock allowed by law or charter, and the amount paid up; the amount of funded and of unfunded debt, with period of funded debt, and rate of interest thereon, and the amount of all sinking funds provided for the redemption of such debts; the number of acres of land derived from public grants remaining unsold; the total cost of construction, of equipment, and of all permanent investments, including the cost of purchase of other lines of road and of telegraph lines; the amount and character of rolling stock; the number and class of employés; the receipts of such corporation or company for the last complete fiscal year preceding June first, eighteen hundred and eighty, exhibiting separately the earnings from through-freight, from local freight, from passengers, from expresses, and from mails; the expenses of such corporation or company for said fiscal year, exhibiting separately the amount paid for salaries and wages, for fuel, for national, state, and municipal taxes, for interest on bonds and other debts, for dividends, for repairs, for damage to freight and personal injuries; also, the operations of said fiscal year, including mileage of freight, of passenger, and of construction and repair trains separately, the number of passengers carried, and the amount and class of freight transported each way; also, the number, character, and, so far as ascertained, the cause of all casualties by which life was lost, which occurred upon or within the trains, the tracks, or the buildings of said corporation or company during said fiscal year, and the extent of injury to life and limb resulting therefrom; also the terms of all agreements and contracts by which sleeping cars, palace, and parlor cars, so called, express cars, and cars of transportation companies, not identical with the corporation or company making the return herein required, are run upon such road or roads, and the extent of such service, and the amount of all receipts therefrom during the said fiscal year. The Superintendent of the Census shall require and obtain from the owners, proprietors, or managers of every incorporated express company, the following facts, to wit: Name of corporation or company; capital paid up; total capital stock, and to what extent the same has been watered, and how often corners have been made on such watered stock; length of lines in miles; whether the business is conducted by rail, vessel, or otherwise; total amount paid to railroads or vessels for use of line or lines; number of officers, number of persons engaged in general administration; number of agents and messengers; total receipts, total expenditures, exhibiting separately amount paid for salaries, for repairs, and for general expenses. He shall also in like manner require and obtain, from the owners, proprietors, or managers of every telegraph company, the following facts, to wit: Name of corporation or company; terminal points connected; capital and capital paid up; length of lines in miles; miles of wire; number of officers; number of persons engaged in general administration; number of persons engaged as telegraph-operators; the number of messages transmitted by officers of the United States; the number of messages transmitted for the press; the number of messages transmitted

for private parties; total number of messages transmitted; total receipts from messages; total expenditures of the company, exhibiting separately the amount expended for salaries, for repairs, and for general expenses. He shall, also, in like manner, require and obtain, from the officers or managers of all life-insurance companies, the following facts, to wit: Name of company; amount of capital and paid up capital; the number of persons employed in the general administration; the number employed as agents; the total gross assets of the company, exhibiting separately realized assets, deferred and unpaid premiums, and premium notes and loans; total liabilities of the company, exhibiting separately losses adjusted and unadjusted, losses resisted, scrip and other dividends, dividends to policy holders not applied, reinsurance fund; all other claims, including capital; receipts from cash premiums; receipts from all other sources; total cash expenditures, exhibiting separately amount paid for losses and claims, dividends to stockholders, dividends to policy holders, commissions, officers' salaries, medical examiners' fees, national, state and local taxation, and all other cash expenditures; amount and character of deposits in each state to secure policy holders; premium-note expenditures; the number and amount of policies issued during the year; also exhibiting policies terminating during the year, the number and amount terminated by death, by expiration, by surrender, by lapse, by change; total number and amount of policies in force, and the amount of the premiums; the amount of losses in cash and notes and the percentage of the loss to the total amount of policies in force; percentage of assets to risks in force. He shall in like manner, require and obtain, from every fire and marine insurance company, the following facts, to wit: Name of company; amount of capital stock; the amount paid up; the number of persons employed in general administration; the number employed as agents; the gross assets of company; the total liabilities, exhibiting separately the amount of losses adjusted, losses unadjusted, losses resisted, reinsurance fund; and all other liabilities, including capital; also the total receipts, exhibiting separately fire premiums, marine and inland premiums, and receipts from all other sources, including interest, dividends, and rents; also the total expenditures, exhibiting separately the number and amount of fire losses, of marine and inland losses, dividends, commissions, officers' salaries, state, national, and municipal taxes, and all other expenses. He may require such other information, as to the subjects of this section, as, in his judgment, may be necessary to secure such returns as will exhibit the transactions of said several companies.

SEC. 18. Each enumerator in his subdivision shall be charged with the collection of the facts and statistics required by each and all the several schedules, with the following exceptions, to wit: In cities where an official registration of deaths is maintained, the Superintendent of Census may, in his discretion, withdraw the mortality schedule from the several enumerators within such cities, and may obtain the statistics required by this act through official records, paying therefor such sum as may be found necessary, not exceeding the amount which is by this act authorized to be paid to enumerators for a similar service, namely, two cents for each death thus returned. Whenever he shall deem it expedient, the Superintendent of Census may withdraw the schedules for manufacturing and social statistics from the enumerators of the several subdivisions, and may charge the collection of these statistics upon experts and special agents, to be employed without respect to locality. And said Superintendent may employ experts and special agents to investigate in their economic relations the manufacturing, railroad, fishing, mining, and other industries of the country, and the statistics of telegraph, express, transportation, and insurance companies, as he may designate and require. And the Superintendent of Census shall, with the approval of the Secretary of the Interior, prepare schedules containing such interrogatories as shall, in his judgment, be best adapted to elicit this information, with such specifications, divisions, and particulars under each head as he shall deem necessary to that end. Such experts and special agents shall take the same oath as the enumerators of the several subdivisions, and shall have equal authority with such enumerators in respect to the subjects committed to them, and they shall receive compensation at rates to be fixed by the Superintendent of Census, with the approval of the Secretary

of the Interior: *Provided*, That the same shall in no case exceed six dollars per day and actual traveling expenses.

SEC. 19. The enumeration required by this act shall commence on the first Monday of June, and be taken as of that date, and each enumerator shall prosecute the canvass of his subdivision from that date forward on each week-day without intermission, except for sickness or other urgent cause; and any unnecessary cessation of his work shall be sufficient ground for his removal and the appointment of another person in his place; and any person so appointed shall take the oath required of enumerators, and shall receive compensation at the same rates. And it shall be the duty of each enumerator to complete the enumeration of his district, and to prepare the returns hereinbefore required to be made, and to forward the same to the supervisor of his district on or before the first day of July, eighteen hundred and eighty, and in any city having over ten thousand inhabitants under the census of eighteen hundred and seventy, the enumeration of population shall be taken within two weeks from the first Monday of June; and any delay beyond the dates above respectively, on the part of any enumerator, shall be sufficient cause for withholding the compensation to which he would be entitled by compliance with the provisions of this act, until proof satisfactory to the Superintendent of Census shall be furnished that such delay was by reason of causes beyond the control of such enumerator.

SEC. 20. The sum of three millions of dollars is hereby fixed and limited as the maximum cost of the census herein provided for, exclusive of printing and engraving, and it shall not be lawful for the Secretary of the Interior or the Superintendent of Census to incur any expense or obligation whatever, in respect to said census, in excess of that sum. And the sum of two hundred and fifty thousand dollars for printing and other preliminary expenses is hereby appropriated out of any money in the Treasury not otherwise appropriated, which sum shall form part of the three millions fixed as the cost of the census.

SEC. 21. The Secretary of the Interior is hereby authorized, whenever he may think proper, to call upon any other department or officer of the government for information pertinent to the enumeration herein required.

SEC. 22. That if any state or territory, through its duly appointed officers or agents, shall, during the two months beginning on the first Monday of June of the year which is the mean between the decennial censuses of the United States is by this act directed to be taken, take and complete a census in all respects according to the schedules and forms of enumeration in the census of the United States and shall deposit with the Secretary of the Interior, on or before the first of September following, a full and authentic copy of all schedules returned and reports made by the officers and agents charged with such enumeration, then the Secretary of the Treasury shall, upon receiving a certificate from the Secretary of the Interior, that such schedules and reports have been duly deposited, pay, on the requisition of the governor of such state or territory, out of any funds in the Treasury not otherwise appropriated, a sum equal to fifty per centum of the amount which was paid to all supervisors and actual enumerators within such state or territory at the United States census next preceding, increased by one-half the percentage of gain in population in such state or territory between the two United States censuses next preceding: *Provided*, That the blank schedules used for the purposes of the enumeration herein provided for shall be similar, in all respects of form and size of heading and ruling, to those used in the census of the United States.

SEC. 23. The Superintendent of Census, with the consent of the President, may, at any time, remove any supervisor of census, and fill any vacancy thereby caused or otherwise occurring; and the supervisor of census may, with the consent of the Superintendent of Census, remove any enumerator in his district, and fill the vacancy thereby caused or otherwise occurring; and in such cases but one compensation shall be allowed for the entire service, to be apportioned among the persons performing the same in the discretion of the Superintendent of Census.

SEC. 24. All laws and parts of laws inconsistent with the provisions of this act are

hereby repealed; and all censuses subsequent to the Tenth Census shall be taken in accordance with the provisions of this act unless Congress shall hereafter otherwise provide.

Approved March 3, 1879.

AN ACT to amend an act entitled "An act to provide for taking the Tenth and subsequent censuses", approved March third, eighteen hundred and seventy-nine.

[PUBLIC—No. 39.]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That all mail matter of whatever class, relative to the census, and addressed to the Census Office, to the Superintendent, his chief clerk, supervisors, or enumerators, and indorsed, "Official business, Department of the Interior, Census Office," shall be transported free of postage; and if any person shall make use of any such indorsement to avoid the payment of postage on his private letter, package, or other matter in the mail, the person so offending shall be deemed guilty of a misdemeanor, and subject to a fine of three hundred dollars, to be prosecuted in any court of competent jurisdiction.

SEC. 2. That the seventeenth section of an act entitled "An act to provide for the taking of the Tenth and subsequent censuses" be amended by striking out so much thereof as provides that schedule one contain an inquiry as to the naturalization of foreign-born persons, and that schedule four contain an inquiry relating to the ownership of the public debt of the United States, by whom owned, and the respective amounts: *Provided*, That the Superintendent of the Census shall collect and collate, as far as possible, by experts and agents and from officers of the government, information in relation to the ownership of the public debt of the United States.

SEC. 3. That section seventeen of the act aforesaid be so amended as to allow the report which the Superintendent of the Census is required to obtain from railroad corporations, incorporated express companies, telegraph companies, and insurance companies to be made for the fiscal year of the incorporation or company having its termination nearest to the first of June, eighteen hundred and eighty.

SEC. 4. That section nineteen of the aforesaid act shall be amended so as to require the enumeration to commence upon the first day of June, eighteen hundred and eighty, and further so as to require that the enumeration of population in cities having over ten thousand inhabitants shall be taken within two weeks from the first day of June, eighteen hundred and eighty.

SEC. 5. That section five of the act aforesaid shall be amended so as to allow that in case it shall occur in any enumeration district that no person qualified to perform and willing to undertake the duties of enumerator resides in that district, the supervisor may appoint any fit person, resident in the county, to be the enumerator of that district.

SEC. 6. That section nine of the act aforesaid be, and the same hereby is, so amended as to require each enumerator, immediately after completing the enumeration of the population of his district, and before forwarding the same to the supervisor, to make and file in the office of the clerk of the county court, or in the office of the court or board administering the affairs of the county to which his district belongs, a list of the names, with age, sex, and color, of all persons enumerated by him, which he shall certify to be true, and for which he shall be paid at the rate of ten cents for each one hundred names. He shall give notice by written advertisement, at three or more public places in his district, that he will be at the court-house of said county on the fifth day after filing said list, not including Sunday, from nine o'clock ante-meridian to six o'clock post-meridian, and the following day, for the purpose of correcting his enumeration by striking out or adding the designation of persons improperly enumerated or omitted; and on the days so designated he shall, in accordance with said notice, proceed to correct, on such reliable information as he may obtain, all omissions

and mistakes in such enumeration, and to that end he may swear and examine witnesses, who shall testify subject to the pains and penalties of perjury. The result of such inquiry for correction, and the whole number of persons by him enumerated, he shall make known to the bystanders, if any. And the time given enumerators by said act to make return to supervisors is hereby extended fifteen days. And each enumerator shall be paid for his services in correcting his schedule of inhabitants, as required by this act, a sum to be fixed by the Superintendent of Census, in no case to exceed two dollars and fifty cents per day. And that the oath of office prescribed by section seven of said act be so amended as to authorize and require the making and filing the list of inhabitants as required by this act.

SEC. 7. That to pay the enumerators for the additional services required by this act, the sum of one hundred and twenty-five thousand dollars, or so much thereof as may be necessary, be, and the same hereby is, appropriated out of any money in the Treasury not otherwise appropriated.

SEC. 8. The Superintendent of Census shall collect and publish the statistics of the population, industries resources of the district of Alaska, with such fullness as he may deem expedient, and as he shall find practicable under the appropriations made, or to be made, for the expenses of the Tenth Census.

Approved April 20, 1880.

APPENDIX B.

REPORTS OF THE SUPERINTENDENT OF CENSUS TO THE SECRETARY OF THE INTERIOR.

INTERIOR DEPARTMENT, CENSUS OFFICE,
Washington, D. C., November 15, 1879.

SIR: I have the honor to report the operations of this bureau as follows:

At the beginning of the year the Census Office existed by virtue of the provisions of the act of May 23, 1850, the only salaried official being Mr. Harrington, who had served as chief clerk at the Ninth Census, and still remained in charge of the files and records at Washington. The Superintendent of the Ninth Census still held the position without salary, conducting the correspondence arising out of the publications of that census from his home at New Haven, Conn.

On the 13th of March, Mr. Harrington died, after a lingering illness.

On the 12th of April, 1879, the Census Office was organized under the act of March 3, 1879, providing for the Tenth and subsequent censuses, by the appointment of the present Superintendent.

Mr. C. W. Seaton, of New York, a chief of division at the census of 1870, and the superintendent of the New York state census of 1875, was appointed chief clerk.

Clerical appointments of a temporary nature have been made at successive dates, as the exigencies of the service required.

The work of the Census Office, since the organization, has been of two distinct kinds:

First. Work in preparation for the enumeration, which is by law to commence on the 1st of June, 1880.

By the statement of the case, none of the work of this character yields statistical results. It is in no part definitive, but is purely preliminary, embracing the preparation of schedules, the subdivision of the country into supervisors' districts, the canvass of the geographical conditions of enumeration in the several sections for the purpose of grading the rates of compensation so as to secure at once the highest efficiency and the highest economy, the entertaining and answering of thousands of applications for appointment, and, finally, the conducting of the large correspondence which the organization of a service of such popular interest brings upon the office charged therewith.

It has not, however, been upon work of this class that the greater part of the labor of the Census Office since its organization has been bestowed.

Second. The collection of certain classes of statistics for the current year has been going on since June 1.

There is, by the act of 1879, as by that of 1850, both a census day and a census year. The census day is June 1, 1880; the census year comprises the twelve months ending at that date. The census day is the day on or for which the count of inhabitants is required to be made, and certain facts relating to the status of population and industry to be obtained; the census year is the period for which certain other classes of facts, relating to the movements of population and the operations of industry, are required to be taken.

But while the act of 1879 and that of 1850 are alike in thus instituting a census year for the movements of population and industry, as well as a census day for deter-

mining their status, the two acts differ widely in the agencies they establish and the methods they prescribe for obtaining those results.

By the act of 1850, all the statistics to be obtained in the census were to be collected by the regular enumerators in their house-to-house canvass of their several districts. The facts relating to mining, to the fisheries, to agriculture, to manufactures, to the mortality of the population, and to many other matters of social and industrial interest, were to be ascertained and reported on by the same officers who made the count of population.

The inadequacy and the inaccuracy of the statistics thus obtained, which were sometimes positively discreditable and even disgraceful to the census, their only possible effect being to mislead the reader and misrepresent the country, led to the introduction of provisions into the act of March 3, 1879, by which the Census Office is authorized to withdraw certain classes of statistical inquiries from the ordinary enumerators and place them in the hands of experts and special agents.

In the spirit of this enlightened provision the Superintendent has carefully canvassed the field of investigation, with a view to ascertaining what parts of the field promise to yield results to such special inquiries of sufficient value, over and above what might be expected to be obtained through the ordinary course of enumeration, to repay the necessarily higher cost of the service.

In consequence of this inquiry several important investigations have already been set on foot, of which those involving the greatest amount of labor and expense are here indicated.

SPECIAL INVESTIGATIONS CONDUCTED BY EXPERT AGENTS.

I.—THE FISHERIES.

The statistics of fisheries have been a blank, or, it would be more proper to say, a blotted, page of the census reports, ever since those statistics were first sought to be obtained, in 1850.

It is questionable whether the results obtained ever reached twenty, if indeed they ever reached fifteen per cent. of the actual facts.

The census of 1870 reported a total value of products of only eleven millions of dollars, among the items being 647,312 bushels of oysters!

Statistics like these were only calculated to bring the census into discredit, even when they did not have consequences of a more practical nature, as in the international arbitration at Halifax in 1877.

Under the provisions of the act of March 3, 1879, the Superintendent in June completed arrangements with Professor Baird, secretary of the Smithsonian Institution, and president of the United States Fish Commission, by which the scientific direction of a comprehensive investigation into the statistics of the fisheries and the fishing populations of the United States should be assumed by himself, while the administrative charge of the service remained with the Census Office.

The details of the scheme having been arranged, a number of experts and skilled assistants, under the personal supervision of Professor G. B. Goode, were put into the field in the early summer.

Special canvassers, well trained for such inquiries, were engaged to proceed in boats along the entire eastern and southern coast, from Maine to Texas, visiting every fishing port or fishing village, and collecting the whole body of social and industrial statistics of the populations engaged in this occupation, together with all facts of economic interest relating to the habits and the haunts of the several species of fish, the methods and apparatus of fishing employed, the labor systems in vogue, &c.

Other parties were engaged to canvass the Pacific coast, the northern lakes, and the western rivers, while special agents were engaged to work up the oyster fishery and to obtain the statistics of the fish markets of the principal ports.

Some of these parties have now been four months in the field. The character of the reports already received puts the success of this investigation beyond a reason-

able doubt. Already large bodies of material are being compiled and tabulated in this office. The work will be actively prosecuted through the winter and the coming summer, until every portion of the field shall have been covered.

II.—THE MINING INDUSTRIES.

(*a*) *The precious metals.*—The census statistics of the production of gold and silver have never possessed the slightest appreciable value, but, on the contrary, have always been erroneous and misleading.

At the census of 1860 returns were obtained from 2,202 mining "establishments", and estimates were made of the product of 5,000 from which no returns were received. Twenty-seven million five hundred and thirteen thousand one hundred and seventy dollars only of product was obtained from actual returns.

The product of the two years 1859 and 1860 had been estimated by the United States Commissioner of Mining Statistics at fifty millions of dollars in 1859 and forty-five millions in 1860.

Of the $27,513,170 actually returned, $10,135,000 belonged to two establishments in San Francisco county, California, employing together but 15 men, and paying but $16,440 annually in wages. Of course, this means that these were simply refining and assaying offices. Making the proper deduction on this account, we have but $17,378,170 of actual metallic product accounted for in the census.

At the census of 1870 special efforts were made to obtain accurate statistics of gold and silver production through the established agencies.

The result was slightly to increase the proportion returned, the amount reported being $26,452,652 out of a production of $61,000,000, as estimated by the United States Commissioner of Mining Statistics.

This last experience would have proved, even if the nature of the case had not abundantly shown, that a canvass by the ordinary enumerators of population must be utterly worthless. A more grotesque figure can scarcely be imagined than that of a man who knows nothing about mining attempting to extract the statistics of capital invested and product obtained from an operator who has his reasons for not telling the truth or any part of it.

Even to the eye of the expert, the *indicia* are few and the statistical tests nice and difficult. The unskilled enumerator becomes simply a butt for ridicule, imposture, and cheap miners' jokes.

Mining having been specially mentioned, in the act of March 3, 1879, as one of the subjects of special investigation, at the discretion of the Superintendent of Census, little hesitation was felt, in view of the facts and conditions recited, in organizing a service for obtaining the statistics of this department of the national industry. The creation, by act of Congress, at the same session, of the Geological Survey, seemed to offer a most fortunate opportunity. A complete understanding and agreement having been reached between the two bureaus, the scientific direction of the investigation into the gold and silver mining of the United States was undertaken by the Hon. Clarence King, Director of the Geological Survey, while the administrative charge of the work rested, as in the case of the fishery investigation, with the Census Office. The arrangement thus effected promises to be successful, not only in attaining great accuracy in the statistics collected, but in effecting much economy of expenditure, the skilled agents of the census being often able to secure, without any additional expense, scientific information respecting the regions they visit for the use of the Geological Survey, and the agents of the latter bureau being often able, incidentally to their own work of exploration, to make extensive collections of facts, of both social and economical importance, for the use of the census.

Parties have been in the field since July. Several of the principal mining regions of the West have been brought under investigation, and I feel assured that it is already put beyond doubt that that portion of the reports of the Tenth Census which deals with the gold and silver product will be of the highest authority.

Especially in this period of universal monetary discussion a complete economical survey of the mines of the United States producing the precious metals must be found of interest and value.

(*b*) *The non-precious metals and coal.*—Arrangements have been completed for a canvass by experts of the whole field of production of iron, copper, lead, and the other non-precious metals, and also of coal. The scientific direction of the work has been undertaken by Professor R. Pumpelly, and the agents of the Census Office have been in the field since September.

III.—POWER AND MACHINERY USED IN MANUFACTURES.

By the act of 1850, no provision was made for obtaining the statistics of power and machinery employed in productive industry.

The omission was a grave one. The number of operatives engaged in any branch of the national industry, or in that industry as a whole, is merely one factor. The other factors are the amount of labor-saving machinery in use, and the amount of steam and water power applied to production. Given the fact that three millions of persons are employed in manufactures, what does this signify, unless it be known what is the aggregate horse-power of all the water-wheels and steam-engines by which their labor is assisted, which cannot at the present moment fall short of the lifting force of thirty millions of men, and may reach a far greater amount.

At the census of 1870 the Superintendent, impressed with the importance of at least approximate statements on this subject, introduced an inquiry into the manufacturing schedule respecting the kind of power in use in each establishment of productive industry, and the number of engines or water-wheels, with their aggregate horse-power. The returns to these inquiries were duly published in the reports of that census, and constituted a valuable, as they were a novel, feature of those reports.

By the act of March 3, 1879, the Census Office is authorized to institute inquiries respecting—

> The kind and amount of power employed in establishments of productive industry, and the kind and number of machines in use, together with the maximum capacity of such establishments, where the Superintendent of Census shall deem such inquiry appropriate.

As the inquiry into power and machinery is eminently one which requires not only technical knowledge, but high scientific training and wide observation, it has been determined to make this department of statistics the subject of a special investigation. General W. P. Trowbridge, professor of engineering in Columbia College, New York, has been appointed the special agent of the Census Office for the purpose of this inquiry.

Trained assistants are already in the field, and the canvass is being actively prosecuted.

IV.—THE DEFECTIVE, DEPENDENT, AND DELINQUENT CLASSES.

The census act of 1850 contained provisions for collecting the statistics of the deaf and dumb, blind, insane, idiotic, and also of all criminals and paupers.

The reason for the special recognition of these classes, in preparing for a census, is fourfold: first, philanthropic, in order that the humane efforts made by individuals or communities for the protection and relief, and, so far as possible, the restoration to society, of the unfortunate classes, may receive intelligent direction; secondly, scientific, in order that the physiological laws which govern the appearance of mental and physical defects, and the social laws which govern the commission of crime, may be disclosed; thirdly, political, in order that the state may know what proportion of its citizens are incapacitated for military and civil service; and, fourthly, economical, in order that it may be known what is the burden laid by pauperism and crime upon productive labor, and what the extent to which exceptional physical infirmities and afflictions in classes of the population, as blindness, deaf-mutism, etc., create an exceptional liability to future pecuniary dependence.

But while the importance of a special enumeration of the defective, dependent, and delinquent classes was fully recognized by the act of 1850, no adequate agencies were provided.

A canvass by the ordinary enumerators of population alone will not succeed in ascertaining the numbers of the several classes, and will totally fail of obtaining those facts relating to their condition which are essential to anything like a just view of the subject.

At none of the three censuses taken under the act of 1850 have the numbers of a single one of these classes been accurately determined. In respect to some, not even an approximation was afforded. It has been exceedingly difficult for the most highly-trained specialists to draw any valuable deductions from the partial and fragmentary data obtained, while the legislator and administrator and the public generally were likely to be misled, rather than instructed, by the figures contained in the census tables devoted to these classes of the population.

In this view, both of the importance of the subject involved and of the insufficiency of the agencies hitherto employed, advantage has been taken of the provisions of the act of 1879 to initiate a systematic investigation, under expert direction, of the whole field of the defective, dependent, and delinquent classes.

Mr. Fred. H. Wines, for ten years the secretary of the Illinois Board of Commissioners of Public Charities, has been appointed the special agent of the Census Office, and has undertaken an inquiry which for breadth of plan and fullness of detail leaves nothing to be desired.

If a moderate success be realized, of which I feel confident, the statistics will be far in advance of anything secured at any preceding census.

If this scheme can be carried out to a complete result, of which I have hopes, the information obtained will have a value which it would be difficult to express.

V.—THE SOCIAL STATISTICS OF CITIES.

In 1790 one-thirtieth of the population of the United States lived in cities of 8,000 inhabitants and over; in 1800, one twenty-fifth; in 1810 and also in 1820, one-twentieth; in 1830, one-sixteenth; in 1840, one-twelfth; in 1850, one-eighth; in 1860, one-sixth; and in 1870, a little over one-fifth.

At the last date the inhabitants of cities numbered in all 8,071,875.

It is probable that not only the absolute number but the proportion of the total population resident in cities will be found in 1880 to have still further increased. It will not be surprising if 12,000,000 of persons, constituting a full quarter of the population, are found living in cities of 8,000 inhabitants and over.

The fact that such vast numbers are brought within limited areas not only offers an opportunity for pursuing statistical inquiries which it would be very difficult if not impossible to extend over the whole country, but it also creates a legitimate demand for additional information respecting such communities, inasmuch as they are, by the nature of city life, made subject to vital conditions widely different from those of the population generally. Moreover, the very existence of a city indicates the presence of manufacturing and commercial enterprises, which especially require careful and technical treatment in a census.

For all these reasons it has been deemed best to constitute a department of the census which should be charged with collecting and co-ordinating the social statistics of cities, including all subjects proper to the inquiry.

The appointment of special agent in this department has been accepted by Colonel George E. Waring, jr., of Rhode Island, and a large amount of material of a wide range has already been collected and is in process of reduction.

VI.—STATISTICS OF SPECIAL BRANCHES OF MANUFACTURE.

The manufacturing statistics of the census have not been subject to such overwhelming condemnation as was visited upon the statistics of mining and the fisheries, but they have never been above severe criticism on account of the inadequacy and often in a high degree the inaccuracy of the returns.

Of the manufacturing establishments returned at the census of 1870, the statements respecting 80,000, in round numbers, were found so deficient or so manifestly

erroneous that correspondence was required before they could be taken up for tabulation.

The labor and expense of such a service were enormous, and yet there remained at the last the reasonable suspicion that errors, not large enough to be detected with certainty in the individual, might have reached a height in the aggregate to cause a serious departure from the facts of the case.

In the inquiry, what branches of manufacture should be taken up at the Tenth Census for special investigation, the question of cost has necessarily been the determining consideration.

There is no branch of manufacture the statistics of which would not be improved by a special canvass, but there is a wide difference between the various branches as to the degree of improvement which might thus be effected, and also as to the expense of such a service.

The following is the list of special agents appointed for this purpose:

Edward Atkinson, esq., of Boston: The Manufacture of Cotton.

George William Bond, esq., of Boston: The Manufactures of Wool.

Professor J. S. Newberry, of New York: The Building Stones of the United States, and the Quarrying Industry.

James M. Swank, esq., of Philadelphia: The Manufactures of Iron.

John Lynch, esq., of Portland, Me.: Shipbuilding.

J. D. Weeks, esq., of Pittsburgh: The Manufactures of Glass and of Coke.

W. C. Wyckoff, esq., of New York: The Manufacture of Silk.

Professor C. S. Sargent, appointed to report on Forestry, also takes the statistics of the Lumbering Industry.

VII.—STATISTICS OF SPECIAL BRANCHES OF AGRICULTURE.

In general, the statistics of agriculture can be collected only by enumerators of population in making the tour of their districts.

Manufactures are usually concentrated in considerable villages or cities, so that a special canvass becomes comparatively easy and inexpensive.

But it would involve a vast increase of the cost of the census were special officers, distinct from the enumerators of population, to be appointed to collect the statistics of the two and a half or three millions of farms in the United States.

Nor does the same reason for a special canvass exist in the case of agriculture, as of manufactures, mining, or the fisheries. In agricultural districts the enumerator is likely to be a farmer, or at least farm-bred, and thus to know enough about such matters to be able to fill the schedules intelligently.

At the same time, it has appeared to the Superintendent that the occurrence of the census affords an admirable opportunity for securing certain large classes of facts relating to land systems, labor systems, modes of culture, applications of machinery, etc., in agriculture, wholly in addition to the bare statistics of the crops produced, which, if justly collated, corollated, and illustrated, cannot fail to be of great interest and value.

In this view, several special investigations of wide range have been undertaken, and others will be set on foot as a favorable occasion shall offer.

The following is the list of experts and special agents appointed in this department of the Census:

Professor E. W. Hilgard, University of California: Cotton Culture.

Professor W. H. Brewer, New Haven, Connecticut: The Production of Cereals.

Professor C. S. Sargent, Brookline, Massachusetts: Forestry.

J. R. Dodge, esq., Washington, District of Columbia: Orchard Fruits, Tobacco, Hops.

Clarence Gordon, esq., Newburg, New York: Meat Production in the grazing States and Territories.

Professor Hilgard is assisted by a number of eminent agriculturists and geologists. Several states are being traversed for the purposes of the most thorough and exhaustive

investigation of the conditions and methods of the cultivation of cotton yet undertaken by any government or association. Mr. Gordon has been in the field since July. The other branches of agricultural inquiry have more recently been set on foot.

VIII.—MORTUARY STATISTICS.

But the chief effort made for the collection of statistics relating to the census year, in advance of the occurrence of the June enumeration, though not one requiring the appointment of an expert or special agent, has been in the direction of a mortuary record, to be kept by physicians and surgeons, of cases of death occurring in their practice.

The United States are at a marked disadvantage, in comparison with almost any other civilized nation in the matter of vital statistics. We know not the number of persons born or dying in any year of our political history.

The registration of births, marriages, and deaths, which in other countries is rigidly enforced by adequate provisions and sanctions of law, is in some states not even required by statute, while in only three or four of the states which maintain a formal registration is the service of such a character as to give any considerable value to the results.

Mere provisions of law will not secure good vital statistics. There must be vigilant administration by expert and thoroughly trained officials, heavy penalties for delinquency, and a disposition of the public mind which will not only allow but demand the relentless enforcement of the law. It is only when it is popularly seen and appreciated that no one can be born into the community or die out of it without affecting the rights and interests of every preceding or surviving member that adequate legislation and adequate administration will be provided for recording all the essential facts relating to the beginning and the close of every life.

Outside the three, or at the most four states, above alluded to as maintaining a good system of registration, there are perhaps a score of cities which keep up something like a system of recording births and deaths, of which six or seven have established a reputation for the completeness and accuracy of their published reports.

For all the rest of the country there is either no statistical information at all respecting the number of those who are born or die during any given period, or the statistics are palpably defective.

The disadvantage to the United States arising from the lack of good vital statistics is most serious. Not to speak of the unenviable singularity which it gives our country among the civilized and progressive nations; not to speak of the uncertainty in which it involves our sanitary legislation and administration, or of the loss which the science and practice of medicine suffer from the absence of trustworthy information respecting the range and degree of virulence of certain fatal diseases and the rate of mortality in one section as compared with its neighbors; the mere pecuniary disadvantage at which our people are placed, in the important matter of life insurance, would, if truly estimated, far outweigh the whole first cost of good vital statistics. Hundreds of millions of dollars have been invested in life insurance in this country within the last thirty years, and yet we have not even an approximate life table (*a*) of the United States. Insurance companies do not know how much they should charge to be safe; the people do not know how little the companies should charge, to sell insurance at its fair value. All parties are and have been operating in the dark in the matter of interests involving enormous expenditures and receipts, for lack of information which only government can supply, and which in almost all other progressive countries government does supply.

In partial recognition of the importance of mortuary statistics, the act of May 23, 1850, required the return, by the canvassers of population, of all deaths occurring

a I speak with all respect of the effort made by Mr. E. B. Elliott to construct such a table for the Statistical Atlas of the United States in 1874. Mr. Elliott's effort was most praiseworthy, and his qualifications were equal to almost any task, but the fatal deficiencies in the information attainable would not allow success.

during the census year; and if the provisions of the law had been adequate to its intent, the results would have been of great value, even though the facts were obtained but once in ten years.

In truth, however, the statistics of mortality obtained through the census have always been defective, and often grossly misleading. In the Seventh Census, 1850, there were returned but 324,394 deaths from a living population of 23,191,876; in 1860, 394,153 deaths from a living population of 31,443,321; in 1870, but 492,263 from a living population of 38,558,371.

It does not need to be said that such a ratio of deaths to living population is maintained in no considerable community of the world. Mr. Elliott estimates that in 1870 41 per cent. of the deaths occurring during the census year escaped record.

The causes of such wholesale omissions in a periodical enumeration may be stated as follows:

In some cases the canvassers fail to put the question; in others, heads of families, or persons answering for them, fail to recall the fact of a death occurring during the year, especially when ten or eleven months have already elapsed since the date of death, and the mind, not unnaturally, refers to the event as having taken place a year or longer before. In still another large number of cases persons die out of families, which class seems not to have been in contemplation of the census law, which makes the return of mortality a family return. In still other cases deaths occur in families, but the very death itself breaks up the family and scatters the surviving members, leaving no one to report the death in the census. In still other cases deaths occur in what are constructively families for the purposes of the census, *i. e.*, boarding-houses, hotels, etc., but the common tie of membership or association is here so casual and so slight that the chances are altogether against the circumstance being retained in memory six or eight months after. (*a*)

In the provisions for obtaining vital statistics the act of 1879 differs from that of 1850, first, by allowing the registration of deaths, under state or municipal authority, to be substituted at the discretion of the Superintendent for the returns of enumerators; and, secondly, by placing it in the power of the Census Office to supplement the strictly official agencies by information derived from other sources. In view of the great importance of the subject, the earliest effort made after the organization of this office was in this direction. A small register was prepared sufficient to contain the record of twenty-four deaths, with a statement of the causes of death, the sex, age, occupation, and nationality of the deceased. A copy of this register was sent to every physician and surgeon, of whatever school, whose address could be obtained by the Census Office, with the request that the recipient would preserve therein a record of all deaths occurring in his practice during the census year. The most laborious correspondence was resorted to in order to form and perfect the list of physicians and surgeons for this purpose.

Nearly 100,000 of these registers have been thus distributed.

The response of the medical profession to this appeal has been most gratifying. Even while the list was being perfected, letters were received from hundreds of physicians offering co-operation, and asking to be furnished with a copy of the projected register.

Almost without exception the medical journals and medical associations of the country, of all schools and names, have commended this effort, and urged their readers or members to contribute towards its success.

The Superintendent cherishes the hope, which, he believes, is not beyond the reason of the case, that this scheme will secure a vast amount of information relative to the vital conditions of our country, which, under judicious treatment, will yield results of high scientific and practical value.

THE COUNT OF THE PEOPLE.

With respect to the house-to-house enumeration of the population, which is the primary and principal object in contemplation of the law, the act of March 3, 1879, makes a wide departure from the methods previously in use.

a Reports of Ninth Census, volume on Vital Statistics, pp. 192, 193.

The more important changes may be briefly stated as follows:

1st. In the stead of adopting, as the units of supervision, districts (judicial districts) formed with reference to other and altogether different purposes, districts are to be formed wholly and simply with reference to the requirements and exigencies of enumeration.

2d. The number of such districts is increased to 150, more than double that of the judicial districts, securing a higher degree of local knowledge in preparation for the enumeration, and rendering possible a minuter supervision of the work while in progress.

3d. In the stead of imposing the duty of supervision in the districts, when formed, upon a class of officers (marshals of the United States courts) selected with reference to other and widely different services, and, in a large proportion of instances, crowded to the limits of their time and strength by prior official duties, officers (supervisors of census) are to be appointed solely with reference to their qualifications for the special and highly technical work of the census.

4th. The subdivision of the census districts for the purposes of actual enumeration is carried far below that required by the act of 1850, the maximum limit being now 4,000 inhabitants (according to the next preceding census), as against 20,000 formerly, and the Census Office being empowered to require a still minuter subdivision of the territory, if the good of the service shall seem to require it. By this change a high degree of local knowledge on the part of the actual canvassers is obtained as a security against defective and erroneous returns of the population.

5th. The period allowed for the enumeration is shortened to one month (the month of June) in rural districts and small towns, and to two weeks in cities, as against five months formerly. This change must result in obviating a large part of the errors resulting from the incessant movements of the population, especially during the later summer months.

6th. The appointments of the actual canvassers (enumerators) are made subject to the approval of the Census Office, a measure absolutely essential to good administration, but strangely overlooked in previous legislation.

7th. Instead of an inflexible rule for determining the compensation of canvassers, which did not recognize the difference in the labor of enumeration caused by the geographical features of the country, and which treated a square mile of river bottom or prairie as the exact equivalent of a square mile of rugged mountain, traversed only by broken roads or bridle-paths, the act of 1879 places the matter of compensation, so far as the canvassers are concerned, in the discretion of the department, which is thus able to combine the economy and efficiency of the service with justice to the persons engaged.

8th. The act of 1879 authorizes, at the discretion of the Superintendent, the use of "prior schedules", or blank forms distributed in advance, to be filled up with deliberation and after consultation between the members of a family; whereas, under the former system of enumeration, the canvasser, in the tour of his district, generally obtained the information from one member, not, as a rule, the head of the family, who was unadvised in advance of the subjects of inquiry, and was called upon to answer hastily a large number of questions relating to several different persons.

The changes of system which have been noted vastly increase the work of the Census Office in making the preparation for the enumeration, but no one should be deemed fit for such a charge who did not rejoice in the added labor and care, in view of the manifold advantages to be obtained.

THE CENSUS LAW.

In making these preparations, through the six months that have elapsed since the organization of the service, the Superintendent has become more and more fully confirmed in the opinion that the legislation of the last Congress on the subject of the census was wise and salutary. Not a single fundamental defect in the scheme of enumeration has appeared, nor has any important change occurred to the Superintendent as likely to result in an improvement of the service.

In two minor matters, strictly matters of detail, it is deemed proper to request supplemental legislation; these are—

1st. The extension of the privilege of free transmission through the mails to matter directed to the Census Office, in answer to its inquiries, or in compliance with its requests.

2d. The abandonment of the interrogatory relating to the ownership of the public debt.

The first of the proposed provisions would simply obviate the necessity of one department of the government paying to another department considerable sums in postage on the public service, involving the keeping of unnecessary accounts and an increase of the apparent cost of the census.

The second would result in removing from the course of the enumeration what is likely to prove a not inconsiderable obstacle. The inquiry respecting the public debt can possibly have no valuable result, inasmuch as the great proportion of these obligations are held by public institutions, banking and insurance corporations, charitable trusts, etc., so that were every householder to answer the question correctly, the information obtained would be partial and fragmentary, accounting for but a part of the body of the debt.

But, secondly, it should be remembered that, in spite of the scheme of "prior schedules" in any degree to which it is likely to be used by the Census Office, the questions on the census schedules will often have to be answered by the women of the family in the temporary or protracted absence of the head thereof.

Usually it may be assumed that the wife or daughter knows little or nothing respecting the investment of the family property, and, even in the cases where the knowledge existed, would hesitate to answer on such a point without the consent of the head of the family. It is a fundamental maxim of enumeration that as few matters as possible should be introduced in the house-to-house inquiry, respecting which the wife and the grown daughter cannot be assumed to be equally intelligent with the husband and father.

Thirdly, even when the head of the family is present, the inquiry respecting property in United States bonds is unlikely to secure trustworthy answers, and is certain to provoke distrust and engender animosity.

On every account, therefore, the Superintendent deems it desirable that the interrogatory should be stricken from the schedule.

COPIES OF THE SCHEDULES.

The question having been raised whether a copy of the returns provided for by the act of March 3, 1879, should not be made, I desire to present the elements of the case, and leave the matter to the decision of the department, or of Congress, the question being, after all, rather political than statistical.

By the act of 1850 it was provided that two copies of all returns should be made, the original schedule to be filed in the office of the clerk of court of the county to which the returns related; one copy to be filed in the office of the secretary of state for the state to which the returns appertained; the second copy to be forwarded to the Census Office at Washington, for its uses, both of compilation and of record.

This provision was complied with in 1850 and in 1860. Prior to the census of 1870 the undersigned, as Superintendent, had the honor to recommend that one of the two copies provided for by the act of 1850 be dispensed with in the approaching enumeration.

The reason given for this recommendation was that a copy of a body of schedules so vast in extent was only to be made at a great expense, and that, in fact, the set of the returns deposited in the county clerk's office was not only useless, but mischievous, being subject, on account of proximity to the individuals and families enumerated, to curious or malicious examination. This recommendation was not followed by legislation, and at the census of 1870 two copies of the returns were made as at 1850 and 1860.

In the draft of a bill submitted with my report of 1878 upon the expediency of new legislation with reference to the approaching Tenth Census a copy of the returns was provided for, one set of the returns to be deposited with the secretary of state of the state to which the returns related; the other, either the original schedules or the copy, as the Census Office might elect, to be forwarded to Washington.

In the census act, however, as it passed Congress, and received the approval of the Executive, no copy of the returns is provided for; but the original schedules, as filled by the enumerators, are to be sent to Washington.

The question now raised is, whether it is expedient thus to dispense with all copies of the census schedules, and trust alone to the originals for all the purposes of the government respecting the enumeration.

The use of a copy of the schedules, if this were to be made, would practically be wholly in the nature of insurance. The resort to the schedules, as deposited in the offices of the secretaries of state for the several states, is likely to be, in general, for the most trivial purposes, and, at the best, infrequent and unimportant.

In some of the states, as I have learned through the personal inspection of officers of this bureau and by correspondence, the schedules of 1850, 1860, and 1870 are not preserved in shape and place to be accessible to visitors; in others they are, in fact, seldom or never visited. (*a*)

So vast and cumbersome is such a body of manuscript, that any information which a citizen might desire to derive from the returns could be given by one of the trained officers of the Census Bureau at Washington with far less effort and with far greater accuracy than by a person unfamiliar with such research, looking, for himself, through the schedules at the state capitals; and it may properly be said that the Census Office cheerfully affords, upon personal application, all information which it is deemed proper to extract from the schedules.

Taking the whole country together, therefore, it does not appear to me that the great expense of making a copy of the returns would be justified by the uses which such a copy, in the several states, would serve.

Were it to be provided that every state should receive a copy of the returns on paying for the expense thereof, I do not believe that a single state would incur this expenditure.

The only use of a copy of the returns which seems to be worth much consideration is that which could be made of it in the event of the destruction or loss of the original schedules, during transmission to the Census Office at Washington, or after receipt there.

As, in the nature of the case, there is, in greater or less degree, a danger of such destruction or loss, it is perhaps worth while to state the economical relations of the subject.

The two copies of the census schedules of 1870 cost, at the rates provided by the act of 1850, $192,660, being at the rate of $96,330 for a single copy. This amount was exclusive of the additional compensation given under the provisions of the acts of March 3, 1871, April 20, 1871, and the joint resolution of June 9, 1870, which will, in the present discussion, not be taken into account. If the population, the farms, the shops, etc., of the country shall, as is probable, be found to have increased 25 per cent. in the interval between 1870 and 1880, the cost of making a copy of the returns would not be less than $120,000.

If to this we add the cost of paper, printing, and distribution, the cost of a copy would not be less than $130,000, and might easily be found to be greater, as in the

a The state of Rhode Island is the only one, so far as I have ascertained, in which the census schedules are frequently consulted. With a population small in the aggregate, and more compact than that of any other state, with a strong interest in antiquarian and statistical research diffused among its people, and with a very systematic and well-organized state census, taken in the intervals of the United States censuses, the people of this highly intelligent commonwealth are reported to make a not inconsiderable use of this class of records in question.

event of a large increase of population, etc. This, then, may be taken as the minimum cost of the insurance in question.

The danger to be apprehended from the destruction or loss of the schedules during transmission to the Census Office could not be held to justify the expense of a copy. Such destruction or loss could not be supposed to extend further than to small fractional portions of the returns.

At the census of 1870, reaching from Maine to California, and from the lakes to the Gulf, not a page of the schedules failed to come to hand, nor was the Census Office obliged to resort for a single statistical fact to the schedules deposited with county clerks or secretaries of state.

Should, however, the entire returns of twenty counties of average population be lost, the expense of a re-enumeration would not exceed one-sixth, or, more likely, one-seventh of the cost of a copy.

The only danger which appears to the Superintendent as possibly justifying the incurring of so considerable an expense for the insurance of the returns is that of their accidental destruction by fire after their receipt by the Census Office at Washington. Such a destruction, total or partial, might of course occur. That not a page of the schedules of any census, beginning with that of 1790, has yet been lost at Washington, affords no certainty of the safety of the incoming schedules. The question simply is, whether the insurance proposed is worth its cost.

The actual expense of enumeration, exclusive of the cost of organization, preparation, supervision, and the compilation of results, and excluding also the cost of the special services and expert agencies provided for by the act of 1879, may be roundly taken at $2,000,000.

Looking at the schedules simply as property representing this amount of value, $130,000 seems a very high rate of insurance for the few months at the close of which, if the plans of the Superintendent are carried out, all the purely political statistics of the census, those, that is, which contain the population of states, counties, cities, and towns, with distinction of age and sex, color, nationality, occupation, etc., will be compiled and made ready for publication. A very small fraction of this expenditure would suffice to make such exceptional and extraordinary provision against all unfavorable contingencies as would reduce the danger of destruction by fire to a minimum, except only in the event of a general conflagration of the city.

But I have no interest to argue against the proposition for a copy of the schedules adversely. The law as it stands, in this regard, represents the desire of Congress to effect a large saving of expense.

The question is not so much a statistical as a political one. If it be felt that, on a matter so fundamental in our political system as the taking of the decennial census for the apportionment of representation among the states, considerations of economy should be strictly subordinate, this office has no objection whatever to interpose. On the contrary, such a provision would relieve the Superintendent of a certain degree of anxiety which, in spite of every precaution, will inevitably attend the custody of the returns if no duplicates of them anywhere exist.

In case provision be made for a copy of the returns, it should be accompanied by an appropriation of the amount necessary to be so expended, not to exceed $150,000.

Very respectfully, your obedient servant,

FRANCIS A. WALKER,
Superintendent.

Hon. C. SCHURZ,
Secretary of the Interior.

DEPARTMENT OF THE INTERIOR, CENSUS OFFICE,
Washington, D. C., December 1, 1880.

SIR: I have the honor to present the annual report of the operations of this bureau:

During the year closed, the Tenth Census of the United States has been taken.

Although the work is substantially complete, returns having been received from all but seven small districts, (*a*) out of the total number of 31,265 enumeration districts formed for the purpose of the census, it will probably be two or three weeks yet before this office will be able to present the complete statistics of the population of the country; and it seems best, therefore, to postpone to a future report all mention of the results of the enumeration, and also all discussion of the methods in use, as well as any suggestions which may require to be made of changes in the census law with reference to future enumerations. I trust during the present month to be able to submit a full account of the working of the acts of March 3, 1879, and April 20, 1880, which were passed with reference to the recent enumeration, together with tables exhibiting the population of each state and county, distinguished as native or foreign, white or colored, male or female.

On the 1st of December, 1879, the force of this office consisted of 44 persons, clerks and other employés. This force was occupied partly in making preparations for the approaching June enumeration of the population, and partly in conducting certain inquiries relating to the census year (the twelve months ending May 31, 1880) then current, especially inquiries concerning the mortality of the different sections of the United States; concerning the fishing, mining, and grazing industries of the country; and concerning the social conditions of our city populations.

The following table exhibits the total number of employés of the office on the 1st of each month succeeding, including May:

	Number of employés.	Amount of pay-roll for preceding month.
January 1, 1880	48	$3, 219 54
February 1, 1880	58	4, 097 30
March 1, 1880	77	4, 589 87
April 1, 1880	86	5, 479 32
May 1, 1880	121	6, 259 58

The approach of the June enumeration required a considerable increase of the force of the office, and as soon as the first schedules were received, in July, from the supervisors of the several districts, the force was rapidly increased to secure the earliest possible revision of the schedules, prompt payment of the enumerators for their services, and an immediate commencement of the work of compilation in the several divisions of the office. The following table exhibits the aggregate number of employés on the 1st of each month from June to December, inclusive:

	Number of employés.	Amount of pay-roll for preceding month.
June 1, 1880	245	$11, 669 25
July 1, 1880	263	14, 512 55
August 1, 1880	448	21, 880 55
September 1, 1880	737	35, 992 71
October 1, 1880	873	45, 411 93
November 1, 1880	1, 015	54, 564 28
December 1, 1880	1, 084	60, 256 03

a Of these, one is in Texas, one in Wisconsin, one in Michigan, two in Maryland, one in Iowa, and one in Dakota.

The exigencies of the service ever since the 1st of May have required a considerable clerical force to be maintained upon work at night.

It is the view of the Superintendent that the compilation and publication of the several classes of statistics should be pushed forward with the utmost expedition.

While the census will always remain of value for purposes of comparison with preceding periods, the first and greatest use of the census is its immediate use, not only for determining the distribution of political power, according to the provisions of the Constitution, but also for directing state and national legislation, and for guiding individual and social effort for the promotion of public interests, and for the amelioration of the condition of the criminal, afflicted, and dependent classes.

Every year and every month, therefore, which can be saved in the compilation and publication of the census statistics adds appreciably to their value. I will not say that the country could well afford to pay largely for thus hastening the promulgation of the results of the census, but, rather, that the country could on no account afford to allow any delay therein beyond the time absolutely necessary to secure careful revision and a correct compilation of those results. In fact, however, when the saving of the general expenses of the office is taken into account, a prompt compilation and an early publication of the census statistics secure an actual economy of expenditure. In this view, the work of this office will be pressed forward with the utmost energy until it is brought to a full completion. And, in order to attain the earliest practicable publication of results, I have the honor to recommend that Congress be asked to authorize the printing, by special contract, under the supervision of the honorable Secretary of the Interior (and, if it be thought desirable, also of the Printing Committees of the two houses of Congress), of the several reports of the census as fast as prepared.

With the enormous pressure upon the Public Printer, where every government service is clamoring for early action upon its own work, and where requisitions of weeks' if not of months' standing must have priority to the census reports, a great saving of time could undoubtedly be effected by the adoption of the foregoing recommendation.

Several important reports will be ready for publication during the course of this winter, and I cannot but think that it would afford much gratification to the country if they could be pushed through the press with all the expedition which belongs to private enterprise when time is made of the essence of the contract, as in this case it should be.

In addition to the several special investigations set on foot during the year 1879, as mentioned in the last annual report of this office, the following important departments have also been assigned to special agents for investigation, under the provisions of the eighteenth section of the act of March 3, 1879, and the eighth section of the act of April 20, 1880:

Robt. P. Porter, esq., Statistics of Wealth, Debt, and Taxation.

Dr. Henry Randall Waite, Statistics of Churches, Schools, and Libraries.

Major John W. Powell, Social and Industrial Statistics of the Indian Tribes.

Ivan Petroff, esq., Population, Industry, and Resources of Alaska.

S. N. D. North, Statistics of Newspapers and Periodicals, and of the Book-Publishing Interest.

Colonel J. B. Killebrew, Statistics of the Tobacco Culture.

Wm. L. Rowland, esq., The Chemical Manufacturing Industries.

Henry Hall, esq., Shipbuilding.

Professor S. F. Peckham, Statistics of Petroleum Production.

George W. Hawes, Ph. D., Statistics of the Quarrying Industry.

Colonel Carroll D. Wright, The Factory System.

With the exception of the last four investigations, which have but recently been set on foot, the work has in each progressed so far as to give assurance of a very marked degree of success to result from the use of the appropriate agencies authorized by the enlightened provisions of the sections referred to.

The authority conferred by the eighteenth section for the appointment of special agents to collect the manufacturing statistics of cities and considerable towns has been made use of by this office to the extent of appointing such agents in 276 cities and towns, the total number of agents appointed being 365. From 260 of these cities and towns full returns have been already received, and an examination of the schedules shows that the value of the manufacturing statistics of the present census has been vastly enhanced by the system thus adopted.

In the remaining sixteen, embracing the largest cities of the country, from which returns, on account of the great number of establishments to be canvassed, are not yet fully due, the work is, according to full and frequent advices received at this office, progressing in the most satisfactory manner. All the returns within this department of the census will, it is believed, be in possession of this office during the present month, when the compilation of the manufacturing statistics will be pushed rapidly forward.

The work of paying the enumerators for their services has been carried on with the utmost expedition which was consistent with justice to the Census and to the Treasury.

It has been necessary to ascertain that each part of the enumerator's work has been properly done before he could safely be paid, and it has also been necessary to guard each statement and payment of account with all the checks which would have been necessary in case of much larger payments. The accounts of 28,410 enumerators have already been stated and settled, involving a total expenditure of $1,820,027 34; of the remaining 2,855 cases, the accounts of 1,242 have been stated, and vouchers have been mailed to the enumerators for their signature. In 1,199 cases the accounts are now in course of adjustment. In 414 cases accounts have been suspended, owing to deficiencies or irregularities in returns or to the failure of supervisors to make the required statements of time occupied or work done, or to the necessity of still further investigating matters connected with the enumeration. I have no reason to doubt that the present month will see all the enumerators paid for their services, except only in cases where a suspension is required, for reasons which are unmistakably connected with some fault, more or less serious, on the part of the enumerator himself.

The total disbursements on account of the Tenth Census to December 1, 1880, are as follows:

Supervisors of census:		
Salaries	$53 000 00	
Clerk hire and miscellaneous	54, 801 12	
		$107, 801 12
Enumerators		1, 820, 027 34
Special agents for the collection of the manufacturing statistics of individual cities:		
Salaries	39, 607 93	
Office rent and miscellaneous	3, 825 66	
		43, 433 59
Special agents at large for the collection of industrial and social statistics:		
Salaries	82, 435 82	
Clerk hire	48, 777 40	
Traveling expenses	55, 733 01	
Office rent and miscellaneous	16, 903 66	
		203, 849 89
Census Office:		
Salaries	288, 708 84	
Rent and fuel	5, 769 55	
Furniture and fittings	25, 942 09	
Stationery	24, 464 12	
Printing and binding	63, 310 33	
Traveling expenses and miscellaneous	8, 750 42	
		416, 945 35
Total		2, 592, 057 29

An acknowledgment of the services of the supervisors of the several districts will more appropriately form a part of the report soon to be made upon the results of the census and the actual workings of the census law, as tested in the recent enumeration.

But I cannot deny myself the pleasure of anticipating that occasion so far as to say that the very difficult and critical duties of that office have been discharged, with but inconsiderable exceptions, in a manner most satisfactory. The zeal, energy, and prudence displayed by these officers, their provision against the accidents of enumeration, and their intelligent comprehension of the wants of their districts, entitle them to the highest commendation.

In but three cases has it been found necessary to use the authority conferred by the twenty-third section of the act of March 3, 1879, for the removal of supervisors and the appointment of their successors, and in neither of these cases were the causes requiring removal such as to reflect upon the personal or official integrity of the supervisor so removed.

I have the honor to be, very respectfully, your obedient servant,

FRANCIS A. WALKER,
Superintendent of Census.

Hon. CARL SCHURZ,
Secretary of the Interior.

DEPARTMENT OF THE INTERIOR, CENSUS OFFICE,
Washington, D. C., November 1, 1881.

SIR: I have the honor to present the annual report of the operations of this bureau. The last annual report bore date the 1st of December, 1880. In the interval the field-work of the census has been completed in all the departments, except those relating to the statistics of shipbuilding, to the production of petroleum, the quarrying industry, and to the population, resources, etc., of Alaska. Owing to the difficulty of securing the proper agents, the field-work in these departments was not begun until long after the others were in full operation, and the completion of the work has consequently been delayed. Only a few weeks of field-work, however, now remain to be performed by the six agents still employed in these departments.

The year has also witnessed the rapid progress of the tabulations and compilations required to reduce the raw material of the enumeration into statistical form.

It is perhaps not generally understood that nearly as many days' labor are required to complete the tabulations and compilations at the central office as are needed to perform the entire work of enumeration in the field. An efficient enumerator can, in a city, or even in a well-settled rural district, take down, upon a page of his schedules, the names of fifty persons living in ten families, with all the particulars required by law to be collected, in a shorter time than the same man could distribute those fifty names according to the various classes of facts taken for compilation, viz, by age, by sex, by color, by place of birth, by occupation, by the places of birth of parents, by illiteracy, by conjugal condition, etc., and make all the various combinations thereof which go to form the tables usually published in the census reports.

The work of tabulation and compilation has been pressed forward with great rapidity, from the fact that the Superintendent felt that it was of the highest consequence to secure an early publication of the results of the census. In the last annual report of the bureau the number of persons employed on the 1st of December, 1880, was stated as 1,084. The maximum of clerical force was reached on the 15th of March, 1881, when the number of employés of all grades was 1,495.

The co-operation of so large a clerical force has allowed a very rapid progress in the compilation and tabulation of results. Five-sixths, at least, of the clerical labor of the census has already been accomplished. The results of the compilations are now being put into the form of tables for publication.

The following statement gives the population of the several states and territories, as finally determined. The total differs by 2,917 from that contained in the report of this office under date of January 7, 1881. This, however, is but the net result of individual changes, amounting to many times that number, due to the exclusion of persons twice returned in the census (as, for instance, once at their homes, and again in asylums, prisons, almshouses, etc.), and to the supplying of the names, in even greater number, of persons ascertained to have been omitted from the enumeration.

Population of the United States according to the census of 1880.

Alabama	1,262,505	Montana	39,159
Arizona	40,440	Nebraska	452,402
Arkansas	802,525	Nevada	62,266
California	864,694	New Hampshire	346,991
Colorado	194,327	New Jersey	1,131,116
Connecticut	622,700	New Mexico	119,565
Dakota	135,177	New York	5,082,871
Delaware	146,608	North Carolina	1,399,750
District of Columbia	177,624	Ohio	3,198,062
Florida	269,493	Oregon	174,768
Georgia	1,542,180	Pennsylvania	4,282,891
Idaho	32,610	Rhode Island	276,531
Illinois	3,077,871	South Carolina	995,577
Indiana	1,978,301	Tennessee	1,542,359
Iowa	1,624,615	Texas	1,591,749
Kansas	996,096	Utah	143,963
Kentucky	1,648,690	Vermont	332,286
Louisiana	939,946	Virginia	1,512,565
Maine	648,936	Washington	75,116
Maryland	934,943	West Virginia	618,457
Massachusetts	1,783,085	Wisconsin	1,315,497
Michigan	1,636,937	Wyoming	20,789
Minnesota	780,773		
Mississippi	1,131,597	Grand total	50,155,783
Missouri	2,168,380		

During the first half of 1881 the suspension of the work of compilation in this office was threatened by a very serious obstacle, namely, the failure of the appropriation for the service.

When, on the 5th of January last, this office recommended an additional appropriation of $500,000, to complete the work of the census, it was done in perfectly good faith, in the belief that the sum named would be adequate to that end. At that time, however, a very large part of the field-work in the departments of mining, manufactures, and social statistics still remained to be done. The cost of completing that service has been found to be heavier than was at the time anticipated. Moreover, the tabulations which had been undertaken in the central office, upon a scale far exceeding that of any preceding census, proved to be more laborious and expensive than was expected. Another source of expense beyond the estimates of the Superintendent, and one perhaps as important as either of the two just indicated, has been found in the occasions, which have developed in the course of our investigations, for securing accuracy and completeness in the statistical material brought into the office by the enumeration, beyond the degree heretofore attempted in a census of the United States.

When I had the honor to submit the several reports of the Ninth Census I felt compelled, in simple truthfulness, to say, in respect to not a few of the tables com-

prised in the three volumes, that the statistics contained were, to a great extent, incomplete and defective, and that in some cases the material gathered by the enumeration was so far deficient or inaccurate that it would be more creditable not to publish the tables at all, did the Superintendent feel at liberty to suppress them. Remarks of this character will be found scattered throughout the volumes of the Ninth Census.

During the years that have intervened, the investigations and studies of the Superintendent have deepened his conviction of the inadequacy and inaccuracy of many classes of statistics as gathered at previous enumerations under the act of May 23, 1850.

It is doubtful, for instance, whether any of the three censuses taken under that law has obtained one-half of our mineral product, or has compassed two-thirds of the total number of the defective, dependent, and delinquent classes (the deaf and dumb, blind, insane, idiotic, paupers, and criminals), who have by law been made the subjects of a special enumeration.

In regard to still other large classes of statistics, the percentage of omission or error has not been equally great; but in all departments of investigation, concerning alike agriculture, manufactures, and the mining interests of the country, as well as education, public charities, the wages of labor, and other departments of social inquiry, the statistics of the United States census have failed to possess that validity and authority which were to be desired, by reason of manifest or suspected error. Much was done to improve the character of all classes of statistics to be recorded in the census, through the enactment of the enlightened law of March 3, 1879. Greatly widened as the scope of the census was by that enactment, I venture to assert that the improvement in the quality of the statistical material gathered is even more marked than the extension in amount; yet, notwithstanding the higher value of the material brought into the central office through the new agencies provided by the act of 1879, opportunities for revision and correction have frequently presented themselves in the course of the examination and tabulation of that material. Of such opportunities the Superintendent has not been able to refrain from availing himself, whenever the cost was not disproportionate to the value of results. Instead of publishing table after table, as he was obliged to do in 1870, branded as fragmentary and incomplete, if not altogether inaccurate and misleading, the Superintendent has desired, and with great gratification he is able to announce that he believes it wholly practicable, to bring every class of facts which have been embraced in the publication of previous censuses up to the standard of absolute or approximate accuracy, so that no class of statistics shall be put forth at the Tenth Census which are not sound and reliable. This, however, has involved the expenditure of no little time and labor in many departments. For example, in the department relating to the defective, dependent, and delinquent classes, three times as much clerical labor has been expended upon the returns prior to taking them up for compilation as was expended in this department, in all, up to the point of publication in the census report of 1870. The Superintendent is confident that the results will fully justify the effort put forth.

From the causes indicated, viz: first, the unexpected cost of completing the field-work in the departments of mining, manufacture, and social statistics; second, the weight of the new compilations and tabulations undertaken, for the first time, at this office, greatly exceeding the Superintendent's estimate; and third, the labor involved in bringing the statistical material of the census up to a higher point of completeness and accuracy, the expenditures of this office were so enhanced that it became manifest, during the month of May, that the appropriation would not be sufficient to complete the service.

In this emergency two courses were open: first, to disband the office force, retaining only a small number of clerks to prepare for publication whatever statistical matter had already been compiled, and, for the rest, to await the action of Congress upon the recommendation of a new appropriation when it should meet in the December following; or, second, to accept the service of volunteers, upon the condition of

their expressly disavowing any claim against the government being created by their services, and with their aid to carry forward the compilations of the census as rapidly as possible toward completion.

Respecting this alternative, the Superintendent conferred with the honorable the Secretary of the Interior and with the honorable the Attorney-General, who concurred in the opinion that it would be exceedingly unfortunate to disband the office force and discontinue for eight or ten months the work of tabulation and compilation; and that, if a sufficient number of the employés of the Census Office should be found disposed to volunteer their services upon the condition indicated, no legal or political objection interposed. As the result of this conference the following letter was addressed to the honorable the Secretary of the Interior, viz:

DEPARTMENT OF THE INTERIOR, CENSUS OFFICE,
Washington, D. C., May 27, 1881.

Hon. ALONZO BELL,
Acting Secretary of the Interior.

SIR: I have the honor to ask your attention to the following considerations and to a suggestion based thereon.

By an error of calculation, for which I am alone responsible, the estimate for the appropriations required for carrying on and completing the work of the Tenth Census were framed, as the result proves, too low. The vast extent and complexity of the investigations undertaken by this office have caused a more rapid exhaustion of the amount appropriated for this service than was contemplated, and I find myself now in a position of being obliged to suspend the work upon considerable portions of the field until the next session of Congress, unless some exceptional arrangement can be made which will allow the continuance of my present office force.

Such a suspension would be a matter of regret on two accounts: first, because the public interest in the results of the enumeration makes the earliest possible completion of the tabulations and compilations of the office a matter greatly to be desired; and secondly, because such a suspension would involve the disbanding of a clerical force which I sincerely believe is not surpassed in efficiency through all the departments of the government. To disband the force and to recruit another, at a later date, should Congress make appropriation of additional funds for carrying on the service, would of itself involve a certain loss of efficiency.

Fully appreciating the fact that no contract, express or implied, can lawfully be made with any person for services or supplies on behalf of the government in anticipation of an appropriation therefor, I venture to suggest whether it might yet not be consistent with the provisions of law, as well as decidedly for the interest of the public service, to accept as volunteers in completing the work of the census during the coming season such of the members of the present office force as are willing to continue in the office under a complete disclaimer of any claim thereby to be created against the government, and with a formal profession of their willingness to submit the question of their compensation to the decision of Congress, without any alleged obligation to make appropriations on such account.

I am satisfied that at least two-thirds of my present force would esteem it a privilege to be permitted to continue work upon these terms, while the result to the government would be that, at the meeting of Congress in December, it would find the tabulations of the census completely finished, and a considerable portion of the statistical tables in type, ready for distribution.

If this suggestion is deemed practicable, I should be greatly pleased to give effect thereto on being duly authorized, and I pledge myself to use my utmost energy to finish the work with the least possible expenditure of clerical labor.

I have the honor to be, very respectfully,

FRANCIS A. WALKER,
Superintendent of Census.

To this communication the following reply was received, viz:

DEPARTMENT OF THE INTERIOR,
Washington, June 3, 1881.

General F. A. WALKER,
Superintendent Tenth Census.

SIR: I have fully considered your letter of May 27, in relation to the condition of the appropriation for the Tenth Census and the necessity of a suspension of important work unless some exceptional arrangement can be made which will allow the continuance of your present office force. Your suggestions in relation to the acceptance of a volunteer force (provided such can be secured, willing to disclaim all claims against the government on account of services rendered) are fully concurred in by me.

The postponement of the important work upon which you are engaged, on account of a lack of clerical force, would work serious inconvenience and loss to the public interests, and while it should

be clearly understood that the government has no legal right to make any contract, express or implied, that shall bind it in anticipation of appropriations, you are authorized to say to all who desire to serve without pay, and with an express disclaimer in relation thereto, that all of the facts necessary to a full understanding of the case will be laid before Congress at the earliest practicable moment.

Very respectfully, &c.,

A. BELL,
Acting Secretary.

Acting under the authority given in the above letter, an average force of seven hundred assistants has been retained from the 15th of June to the present time. Not only has no falling off in efficiency been manifested by the clerical force as a consequence of the peculiar and regretable condition of service, but the average amount of work done in every division of the office has steadily improved.

The work in every department has made rapid progress, and it is my confident expectation that by the time Congress meets the compilation of the Tenth Census will be substantially completed.

A comparatively small force will further be required to reduce the statistical matter to tabular form and to prepare it for the printer; but it is safe to say that at least eight months have been saved, in the publication of the final results of the census, by keeping the clerical force at work during the summer, as compared with what would have taken place had the office been disbanded and subsequently organized a second time after the meeting of Congress.

While I have spoken thus in regard to the increase in the cost of the Tenth Census above my estimates and calculations, it should not be understood that the census so taken has been expensive, as compared with any preceding enumeration, reasonable allowance being made for the increase of population and other elements of expense.

The Ninth Census cost three millions and a third ($3,336,000). Our population has, in the interval, increased 30 per cent., and other elements of the cost of a census have increased at least proportionally.

An increase of 30 per cent. upon three millions and a third would amount to four millions and a third. By the twentieth section of the act of March 3, 1879, Congress provided only three millions for the expenses of the Tenth Census, *exclusive of printing and engraving*, being a million and a third below its proportional cost, as compared with the census preceding. By the act of March 3, 1881, $500,000 additional were appropriated, making the total appropriation for the purposes of the act of 1879 three millions and a half, or $836,000 below the proportional cost of the Ninth Census. This is all that has thus far been appropriated for this service, exclusive of the amount provided for printing and engraving ($250,000), and of the amount appropriated ($210,000) to meet the expenses involved in carrying out the provisions of the sixth section of the act of April 20, 1880, which act required of the enumerators services altogether additional to those prescribed by the act of 1879. Should, therefore, an additional $540,000 be appropriated for this service, according to the recommendation hereafter to be made, the expense of the Tenth Census, according to the scheme of the act of March 3, 1879, would still be considerably below that of the census of 1870. But such a comparison would not be fair without reference to the vastly wider range of the present census, the minuter and more extensive compilations undertaken, and the improvement in the quality of the results obtained.

The census has, for the first time, collected the statistics of railroads and telegraphs; of fire, marine, and life insurance; while in the departments of agriculture and manufactures the information obtained has been at least double, in mere matter of bulk, what has heretofore been obtained.

In the inquiries respecting taxation and public debts, the investigations of the census have been extended to embrace an amount of detail which exists in regard to the public indebtedness of no other country of the world. In the great field of our mining and fishing industries, the worse than worthless statistics of 1850, 1860, and 1870 will be found replaced by a body of economical, social, and technical information respecting these great and growing interests which will be of incalculable value to

the country. There is not one direction in which the published results of the present census will not cover more ground, divided into greater detail, than any preceding, while the character of the results will testify to a more rigid examination and a more careful revision of the results of the enumeration.

Out of a total appropriation of $3,960,000 (inclusive of the appropriation of $250,000 for printing and engraving, and of $210,000 for the purposes of the act of April 20, 1880), $3,860,068 67 have been expended, leaving a balance of $2,120 50 on the general appropriation (all in the hands of the disbursing officers of the mining and fishery investigations), and of $97,810 83 on the appropriation for printing and engraving. The accompanying table shows the various objects of expenditure, classified under certain general heads.

It appears from this exhibit that $2,094,947 95 have been paid to enumerators and interpreters, $133,457 54 to supervisors of census, while certain re-enumerations, under the orders of the Secretary of the Interior, have cost $8,099 67.

The enumeration of the manufacturing statistics of cities, conducted by 345 special agents, cost $87,085 37. The collection of the statistics of mining industries, including both the precious and the non-precious metals, both east and west of the Mississippi river, have cost $149,897 23, while the collection of the statistics of the fisheries has cost $45,329 19, and other investigations by special agents, smaller sums. The expenses of the central office at Washington have aggregated $1,063,468 48, of which $817,359 40 has been expended as compensation for clerks and other employés.

Statement of disbursements on account of the Tenth Census to October 31, 1881.

The volunteer service thus far (to November 1, 1881) rendered under the arrangements hereinbefore detailed would, if paid for according to the rates of compensation received prior to June 15, 1881, by the several individuals rendering such service, amount to $243,640 92. This statement includes both the clerical force at Washington and the experts and special agents engaged upon field-work or in the preparation of their reports outside of Washington.

I regret to have to add that, beyond the service thus rendered under an express disavowal of any claim being created against the United States thereby, a small body of liabilities has unavoidably been created in bringing the work of the census to a conclusion. As soon as I apprehended the danger of a deficiency I whistled down brakes, and tried to stop the train before it reached the draw; but a service so gigantic, moving so rapidly, has a momentum which it is not always possible to calculate with nice accuracy, and in spite of every effort to escape an actual deficiency (aside from the personal volunteer service heretofore referred to) the office found itself subject to certain calls for which no funds were provided. These were of three classes:

First. The rent of the main census building since the 1st of July, 1881, being at the rate of $1,083 33⅓ per month. The lessors have expressed their entire willingness to await the action of Congress.

Second. Certain amounts from subsidized railroads for transportation of officers and agents of the census, amounting to $3,642 48. Even had sufficient funds been available for the payment, these accounts for transportation could not, up to this time, have been paid, inasmuch as the railroads concerned are delinquent in respect to the repayment of certain sums extorted as regular fare from the agents of the Census Office traveling under instructions and presenting duly-authenticated orders for transportation at government rates.

Third. Certain miscellaneous expenses for traveling, for supplies, and for minor services, in respect to which no arrangement could properly be made for postponing payment. Being unwilling that the persons entitled to these sums, generally in small amounts, should be required to await the action of Congress upon their just and proper claims, I addressed a letter to the honorable the Secretary of the Interior in the following terms, viz:

DEPARTMENT OF THE INTERIOR, CENSUS OFFICE,
Washington, D. C., October 3, 1881.

Hon. S. J. KIRKWOOD,
Secretary of the Interior.

SIR: I have the honor to state that upon ascertaining, in May last, that the appropriation of the Tenth Census would necessarily prove inadequate to the needs of the service, I shut down as quickly and peremptorily as possible upon all sources of expense.

With a service so vast, however, and so widely spread, with between thirteen and fourteen hundred employés in the Washington office, and with several hundred special agents scattered over the country, all the way from Arizona to Alaska, it was not possible to estimate closely the total of unadjusted accounts, while there were some points at which expenditure could not be abruptly terminated (for instance, as by recalling an agent from a distant field already nearly canvassed) without a great loss to the service, amounting to the practical abandonment of what had been done in that field.

I regret to say that, in consequence of the accounts for obligations incurred at the date mentioned proving larger than was anticipated, and of the seemingly imperative necessity of keeping up some small disbursements in several directions for the reason just indicated, there will be required, to carry this office through to the meeting of Congress, several thousands of dollars; it may be three, it may be five thousand.

As no appropriation is available for this purpose, and as it would not be creditable to allow these accounts to remain unpaid, I respectfully propose to the department that it give its sanction to my depositing with the disbursing agent of the department a sum of money, out of my own private resources, sufficient to meet the charges referred to, all accounts to be approved as usual by the Secretary of the Interior, and ordered for payment in the accustomed form.

Should Congress consent to make appropriation for the uncompleted work of the census, I can be reimbursed; if not, the loss will be my own—a loss I would rather submit to than have those who have rendered service to the government, or incurred expenditures on its behalf, suffer for my error in calculating the probable needs of the service.

Very respectfully,

F. A. WALKER,
Superintendent of Census.

To this letter a reply was received from the department, as follows, viz:

DEPARTMENT OF THE INTERIOR,
Washington, D. C., October 4, 1881.

General FRANCIS A. WALKER,
Superintendent of the Census.

SIR: I have the honor to acknowledge the receipt of your communication of the 3d instant, relative to the exhaustion of the appropriation for the expenses of the Tenth Census, and requesting my sanction to your depositing a certain amount of money, from your private means, in the hands of the disbursing clerk of this department to meet certain obligations already incurred, etc.

In consideration of the fact that it is difficult to estimate closely for the expenditures under this head, and that to abruptly terminate all disbursements would necessarily cause great loss to the service, I hereby sanction the proposition you make for meeting these obligations from your own private funds, to be done through the disbursing clerk or in any other way you may desire. In doing this, however, you will understand that I assume no responsibility in the matter, and that such vouchers as you may pay cannot be considered as constituting any claim against the government, and any risk that may be incurred as to your repayment must be assumed by you, pending the future action of Congress in the matter.

Should you do this, it should be officially communicated to Congress at its next session.

Very respectfully,

S. J. KIRKWOOD,
Secretary.

Under the foregoing arrangement $4,889 97 have been paid out of my own private funds in liquidation of these accounts, which are all adjusted to date. Seven or eight hundred dollars more will probably be required to be paid in the same manner prior to the meeting of Congress, of which a full account will be rendered. Should it please Congress to make an appropriation to cover the amounts so expended, I shall be glad to be reimbursed for expenditures made in good faith and for the public interest. If not, I shall accept the decision of that body, and regard the amount so expended as my personal contribution to the success of a great public work.

At the present date the following reports have been prepared, and are all, or nearly all, in the hands of the Public Printer:

First. The report on population, by the Superintendent, assisted by Mr. Henry Gannett, comprising the statistics of population by states, counties, and minor civil divisions, with distinction of white and colored, foreign and native, male and female. This volume will be illustrated by about seventy-five quarto pages of maps and charts, all of which are now in the hands of the engraver.

Second. From the department of fisheries (Professor G. Brown Goode, chief special agent), reports on the oyster industry, by Mr. Ernest Ingersoll; on the whale-fishery, by Messrs. James Temple Browne and A. Howard Clark; on the river fisheries of the United States, by Mr. C. W. Smiley; on the seal-fisheries of Alaska, by Mr. H. W. Elliott. All the reports in this department, as in that next to be mentioned, will be fully illustrated by maps, charts, and diagrams already in the hands of the engraver.

Third. From the department of power and machinery used in manufactures (Professor W. P. Trowbridge, chief special agent), reports on the manufactures of interchangeable mechanism, by Mr. C. H. Fitch; on the water supply of cities, by the chief special agent and Mr. Walter G. Elliott; on milling and the flouring industry, by Mr. Joseph W. K. Neftel; on the water-power of the Southern Atlantic coast, by Mr. Geo. F. Swain; on the water-power of the Northwest, by Mr. James L. Greenleaf; on the water-power of the Missouri River Basin, by Mr. Dwight Porter; on steam-pumps and pumping-engines, by Mr. F. R. Hutton; on shop-tools, also by Mr. Hutton.

Fourth. A report on the production of cereals in the United States, by Professor W. H. Brewer.

Fifth. A report on the newspaper press, by Mr. S. N. D. North.

Sixth. A report on the manufacture of iron and steel, by Mr. James M. Swank.

Seventh. A report on the manufacture of silk goods, by Mr. Wm. C. Wyckoff.

Eighth. From the department of wealth, debt, and taxation, a report on the public debts of the United States, comprising the statistics of state, county, city, town, village, and school-district indebtedness, together with a history of the debts of the

several states, by the chief special agent, Mr. Robert P. Porter, and a full statistical account of the debt of the United States, by Mr. Rafael A. Bayley.

Ninth. From the department of meat production, reports on the cattle and sheep industry of California, Oregon, Texas, Nevada, Washington territory, and Idaho, by Mr. Clarence Gordon, chief special agent. These reports are illustrated with maps showing the range of cattle and sheep occupation.

Tenth. From the department dealing with the social statistics of cities, reports on the cities of New Orleans and Austin.

Eleventh. A report on the tobacco culture of the United States, by Mr. J. B. Killebrew.

Twelfth. A report on the production of the precious metals during the census year 1879–'80, by Hon. Clarence King, chief special agent.

The work of the printing office and of the engraver is so far advanced as to justify the anticipation that all, or nearly all, of these reports will be printed and laid upon the desks of members when Congress shall assemble in December, or within a few days thereafter.

In view of the exhaustion of the appropriation for this service, as recited, I respectfully recommend that the further sum of $540,000 be appropriated for the compensation of those who have rendered services as volunteers, as hereinbefore stated, and for the completion of the Tenth Census. Of this sum about $330,000 would be applied to the payment of the volunteer force of the office, down, say, to the 15th of December, and to the liquidation of the three classes of obligations referred to. The balance would be sufficient to complete all the compilations and tabulations remaining to be effected in order to secure the fullest statement and publication of the results of the enumeration.

I have the honor to be, very respectfully, your obedient servant,

FRANCIS A. WALKER,
Superintendent of Census.

Hon. S. J. KIRKWOOD,
Secretary of the Interior.

[Extract from report of the Secretary of the Interior for the fiscal year ending June 30, 1882.]

PROGRESS OF THE CENSUS.

The compilation of the returns of the Tenth Census and the preparation of the extended report thereupon rapidly approach completion.

The degree of progress attained may be shown by a comparison with the report upon the census of 1870. That report, in three quarto volumes, contained in the aggregate 2,403 pages, text and tabular matter, of which 2,212 pages were solid statistical tables. The subjects which were treated on 2,036 of these pages have been completely covered in the present census by tables which have already been prepared, and are either now in type or are ready for the printer.

These tables are in no instance less extended, but, on the contrary, are in most cases more complete and elaborate than were the corresponding tables in the report of 1870, and will occupy 3,000 or more pages, instead of 2,036, as in 1870.

The preparation of tables to cover the ground of the remaining 176 pages of the report of 1870 is, to say the least, not less than half completed, and will now be expedited by concentration of the clerical force, which is made possible by the completion of other branches of work.

Of the thirty-two chief special agents who have conducted special investigations, sixteen have concluded their work; have either transmitted their reports to the Census Office or hold them in their own hands, practically complete. Eleven others have nearly completed their investigations, and will submit their reports more rap-

idly than they can receive the office revision and be carried through the press, while the remaining five have made satisfactory progress, having their material now all in hand and the writing of their reports well advanced.

Congress at its last session provided for printing the extended reports, to be comprised in some 15,000 pages, quarto, in volumes of 800 to 1,000 pages each, and also a compendium or abridgment in a single octavo volume. It had originally been proposed by the Census Office to issue a compendium in two volumes, the first volume to issue in June or July last, and the remaining one after the completion of the quarto report. This plan was changed near the close of the session, at the request of the Senate Committee on Printing and the House Committee on Appropriations, and the Census Office undertook to prepare for issue during the current autumn a compendium in one volume which should contain a summary of so much of the statistics of the census as could be got ready in that time. The tables, consequently, for such a volume have been prepared and are being put in type and stereotyped by the Public Printer, the press-work for an edition of 25,000 following as rapidly as the 16-page forms are completed, and it is believed that by the 1st of December the work of binding can be commenced.

But for this diversion of effort in the Census Office to the preparation of the Compendium there would be now in the printer's hands copy for six complete volumes, of from 800 to 1,000 pages each, of the quarto report, namely:

I. The complete statistics of population.
II. A volume comprising the principal statistics of agriculture.
III. Manufactures.
IV. Wealth, debt, and taxation.
V. Statistics of mortality.
VI. Professor Hilgard's report upon cotton culture.

Already 2,076 pages for these volumes are in type, of which 1,951 are stereotyped, 1,528 pages having had a small circulation in preliminary office editions of parts of these volumes. The remaining copy for them will soon be placed in the printer's hands, and it is believed that by the close of December the whole will have been furnished.

The remaining volumes will shortly follow, and the whole will reach the printer during the present fiscal year, with a possible exception of a portion of the volume relating to vital statistics, and a portion of the report upon social statistics of cities, not to exceed 1,000 pages in all.

The attention of Congress should be invited to the advisability of further legislation with respect to the inter-decennial state census contemplated by the twenty-second section of the act "to provide for the taking of the Tenth and subsequent censuses," approved March 3, 1879.

Several of the states have already indicated their intention to avail themselves of that provision of law, and the blank schedules, the forms of which are fixed by the act in question, should be modified by the experience of the Tenth Census.

APPENDIX C.

DOCUMENTS RELATING TO THE TAKING OF THE CENSUS OF SOUTH CAROLINA.

WASHINGTON, D. C., *October* 5, 1880.

Hon. ALONZO BELL,
Acting Secretary of the Interior.

SIR: I have the honor to report as follows respecting the enumeration of South Carolina at the Tenth Census:

Early in August certain newspaper reports, relating to the population of the several counties of that state, as ascertained in the census, began to attract public attention and excite criticism. The newspaper statements referred to were generally based upon information given by the supervisors of the three supervisors' districts of the state, or by the enumerators of the several enumeration districts thereof. The schedules at this time had not, in the main, been received at this office.

The nature of the statements referred to were such as to justify the criticism which they received, the gain of population reported above that shown by the census of 1870 being an impossible one, transcending the known capabilities of human procreation. The newspaper statements in question were, in some degree, exaggerated, as the result of a hasty and imperfect count, or of arithmetical errors in compilation; but the schedules of inhabitants, as they arrived successively at this office from the several enumeration districts, bore out, in their general effect, the unofficial announcements.

The following table exhibits the population of each of the counties of the state of South Carolina at the Ninth and at the Tenth Census, respectively. The figures for 1880 are subject to possible slight changes by reason of the discovery of the duplication or omission of individuals or families:

TABLE A.

Counties.	1880.	1870.	Counties.	1880.	1870.
Abbeville	40, 822	31, 129	Kershaw	21, 538	11, 754
Aiken (*a*)	28, 122	.....	Lancaster	16, 903	12, 087
Anderson	33, 613	24, 049	Laurens	29, 444	22, 536
Barnwell	39, 858	35, 724	Lexington	18, 590	12, 988
Beaufort	30, 190	34, 359	Marion	34, 107	22, 160
Charleston	102, 825	88, 863	Marlborough	20, 598	11, 814
Chester	24, 153	18, 805	Newberry	26, 497	20, 775
Chesterfield	16, 345	10, 584	Oconee	16, 256	10, 536

a Formed since 1870.

If we distribute the population of Aiken and Hampton counties, formed since 1870, among the counties to which this territory belonged in 1870, we shall have the following result:

TABLE B.

County.	Total population.		Actual increase.	Per cent. of increase.
	1880.	1870.		
Abbeville	40, 822	31, 129	9, 693	31. 14
Anderson	33, 613	24, 049	9, 564	39. 77
Barnwell	50, 749	35, 724	15, 025	42. 06
Beaufort	48, 957	34, 359	14, 598	42. 49
Charleston	102, 825	88, 863	13, 962	15. 71
Chester	24, 153	18, 805	5, 348	28. 44
Chesterfield	16, 345	10, 584	5, 761	54. 43
Clarendon	19, 190	14, 038	5, 152	36. 70
Colleton	36, 390	25, 410	10, 980	43. 21
Darlington	34, 485	26, 243	8, 242	31. 41
Edgefield	58, 994	42, 486	16, 508	38. 86
Fairfield	27, 766	19, 888	7, 878	39. 61
Georgetown	19, 613	16, 161	3, 452	21. 36
Greenville	37, 494	22, 262	15, 232	68. 42
Horry	15, 574	10, 721	4, 853	45. 27
Kershaw	21, 538	11, 754	9, 784	83. 24
Lancaster	16, 903	12, 087	4, 816	39. 84
Laurens	29, 444	22, 536	6, 908	30. 65
Lexington	20, 253	12, 988	7, 265	55. 94
Marion	34, 107	22, 160	11, 947	53. 91
Marlborough	20, 598	11, 814	8, 784	74. 35
Newberry	26, 497	20, 775	5, 722	27. 54

Orangeburgh	43, 415	16, 865	26, 550	157. 43
Pickens	14, 391	10, 269	4, 122	40. 14
Richland	28, 585	23, 025	5, 560	24. 15
Spartanburgh	40, 408	25, 784	14, 624	56. 72
Sumter	37, 037	25, 268	11, 769	46. 58
Union	24, 081	19, 248	4, 833	25. 11
Williamsburgh	24, 110	15, 489	8, 621	55. 66
York	30, 713	24, 286	6, 427	26. 46
Total	995, 306	705, 606	289, 700	41. 06

In the above table there has been added to the population, in 1880, of Barnwell county, 19,891, a part of the population of Aiken county; to the population of Edgefield, 13,148, on the same account; to the population of Lexington county, 1,663, on the same account; to the population of Orangeburgh county, 2,420, on the same account; and to the population of Beaufort county, 18,767, being the population of Hampton county in 1880, the latter county having been taken entire from Lexington since 1870.

Tables C and D show the increase of colored and white population, severally, within the counties of South Carolina as they existed in 1870, the population in 1880 of Aiken and Hampton counties being distributed as in Table B.

TABLE C.

[This table is exclusive of Chinese and Indians.]

County.	Colored population.		Actual increase.	Per cent. of increase.
	1880.	1870.

TABLE D—Continued.

County.	White population.		Actual increase.	Per cent. of increase.
	1880.	1870.		
Darlington	12,927	10,097	2,830	28.03
Edgefield	21,832	17,040	4,792	28.12
Fairfield	6,885	5,787	1,098	18.97
Georgetown	3,461	2,773	688	24.81
Greenville	22,983	15,121	7,862	51.99
Horry	10,639	7,486	3,153	42.12
Kershaw	7,892	3,809	4,083	107.19
Lancaster	7,937	6,159	1,778	28.87
Laurens	11,778	9,904	1,874	18.92
Lexington	12,238	8,452	3,786	44.79
Marion	15,879	11,428	4,451	38.95
Marlborough	8,026	5,146	2,880	55.97
Newberry	8,235	7,457	778	10.43
Oconee	11,955	8,114	3,841	47.34
Orangeburgh	14,215	5,709	8,506	148.99
Pickens	10,679	7,730	2,949	38.15
Richland	9,189	7,842	1,347	17.18
Spartanburgh	26,370	17,375	8,995	51.77
Sumter	9,973	7,463	2,510	33.63
Union	10,525	8,718	1,807	20.73
Williamsburgh	7,800	5,346	2,454	45.90
York	14,036	12,114	1,922	15.87
Total	391,071	289,667	101,404	35.01

It appears from Table B that the aggregate population of ten counties in 1880 is in excess of 50 per cent. over the reported population of 1870, viz:

TABLE E.

Counties.	Per cent. of increase.
Chesterfield	54.43
Greenville	68.42
Kershaw	83.24
Lexington	55.94
Marion	53.91
Marlborough	74.35
Oconee	54.29
Orangeburgh	157.43
Spartanburgh	56.72
Williamsburgh	55.66

It further appears from a comparison of Tables C and D that the colored population of South Carolina is reported to have increased even more largely than the white, the total gain in the former throughout the state being given as 45.28, while that of the white population is but 35.01. Six counties show a gain of colored population in excess of 70 per cent., as shown in Table F.

TABLE F.

Counties.	Per cent. of increase.
Greenville	103.18
Kershaw	71.76
Lexington	76.68
Marlborough	88.53
Oconee	77.58
Orangeburgh	161.74

Startling as are the gains of population reported in some of the above counties, the returns from certain enumeration districts constituting parts of counties exhibit even more extraordinary results.

The following table shows the population of certain enumeration districts in 1880 as compared with the figures of 1870:

TABLE G.—*Aggregate population of certain minor civil divisions.*

County.	Civil division.	1870.	1880.	Per cent.
Edgefield	Pickens township	1,559	3,939	153
	Norris township	1,485	2,958	100
Greenville	Grove township	1,089	2,361	117
	Gantt township	844	1,731	105
	Greenville township (outside the village)	378	2,152	469
Kershaw	De Kalb township	1,571	6,088	288
Orangeburgh	Orange township	997	3,906	292
	Hebron township	311	960	209
	Liberty township	408	1,215	198
	Orangeburgh Court-House	246	2,140	770
Spartanburgh	Spartanburgh Court-House	1,080	3,253	201

I have said that the gain above reported transcends the possibilities of human procreation. The capabilities of increase have been exhibited on a vast scale, under the most favorable conditions for observation, upon the territory of the United States within the past century, and these capabilities are well understood and susceptible of reduction to at least approximate mathematical statements. In a new community, where land is abundant and fertile, and its acquirement is facilitated by legal provisions for registration and transfer; where the occupations of people are mainly agricultural; where the habits of living are simple, and the absolute requirements of the family are few, a population of European stock may increase, decade after decade, at the rate of 25, 28, or even 30 per cent. in ten years without additions by immigration. This has been so well ascertained in the history of this country as not to require statistical proof to be here adduced. It is even possible that, under circumstances exceptionally encouraging the growth of population in a State having large bodies of unoccupied lands, an increase of 33 or perhaps 35 per cent., wholly irrespective of immigration, might take place in ten years. The gain of population immediately after the revolutionary war, while immigration was proceeding at a very tardy rate,(*a*) showed that where a country has been to a certain extent depleted by war, the gains of population which accompany the first years of peace are exceptionally rapid.

a The entire immigration of the thirty years between 1790 and 1820 was estimated by Dr. Seybert at 250,000, or an average of about 8,000 a year. Meanwhile the population had increased from four millions to nine millions and a half.

TABLE H.—*Increase of population in the United States between* 1790 *and* 1820.

Year.	PER CENT. OF INCREASE.		
	In 10 years.	In 20 years.	In 30 years.
1800	31.1	.....	.....
1810	36.3	84.2	.....
1820	33.1	81.5	145.1

Any gain much above the ratio here indicated, however, is scarcely credible. The circumstances attending the life of any community must be highly exceptional, and the community itself must be of very restricted numbers, to render possible a more rapid rate of increase without accessions by immigration.

The extraordinary gains reported in certain of the counties of South Carolina, and in the state as a whole, over the census of 1870 demanded, therefore, a careful investigation. It was notorious that South Carolina had not profited materially during the ten years since 1870 by immigration, either from foreign countries or from other states of the Union. With so slight advantage from immigration, it was not possible that an old state could have gained in population in the interval since 1870 to the degree which is shown by the comparison of the two censuses. It follows, as a conclusion of the highest authority, either that the census of 1870 was grossly defective in regard to the whole of the state or some considerable parts thereof, or else that the census of 1880 was fraudulent. The census of 1870 might have been defective in a high degree without fraudulent intention, through the incompetence or negligence of the enumerators employed. But the census of 1880 could not have exaggerated the population of the state without absolute fraud, inasmuch as the census law requires the name of every person reported to be written at length on the schedules, with a score of particulars as regards age, sex, nativity, occupation, etc., so that any illegitimate addition whatever to the schedules must be of the nature of a conscious and purposed crime.

COMPARISON OF THE CENSUSES OF 1870 AND 1880.

The error lying between the two censuses indicated, it would at the first glance appear that a strong presumption existed that it was the census of 1880 which was at fault, the census of 1870 being a census taken and completed, a census accepted by the proper department at Washington and incorporated into its reports to Congress, and made the basis of a redistribution of representation by the act of 1872. Unfortunately, however, the authority of the census of 1870 in some sections of the country was not such as to create a very powerful presumption against the subsequent census by reason of marked discrepancies appearing therein.

The census of 1870 was taken under the act of 1850, an act by the provisions of which the control of the Census Office over the enumeration was reduced to a minimum, the authority attaching to the office being altogether insufficient to any considerable degree of responsility for the results reported.

In his report of November 1, 1872, the Superintendent of Census characterized this act in the following terms, to which, after the further experience of eight years, he would, if possible, add emphasis rather than subtract from the force of the condemnation expressed:

It is not possible for one who has had such painful occasion as the present Superintendent to observe the workings of the census law of 1850 to characterize it otherwise than as clumsy, antiquated, and barbarous.

The machinery it provides is as unfit for use in the census of the United States in this day of advanced statistical science as the smooth-bore, muzzle-loading Queen's arm of the revolution would be

for service against the repeating rifle of the present time. It ought not to be possible that another census should be taken under this law; such a thing ought not to be seriously proposed.

The country has suffered more than enough already of discredit and of loss on account of the wretched insufficiency and inappropriateness of the provisions of this ill-constructed and outgrown statute.

By the act thus characterized the charge of the enumeration in the several judicial districts was committed to the United States marshals, officers appointed with reference to altogether different services, and already burdened with a great variety and extent of duties in connection with the courts. These officers were, moreover, not appointed, and were not removable, at the instance of the Census Office or of the Department of the Interior, but belonged to another department of the government, to which they were responsible. In the formation of the subdivisions of their districts for census purposes the marshals were subject to no control whatever on the part of the Census Office, while they were, by law, permitted to constitute districts, in their own discretion, not exceeding 20,000 inhabitants.

But even worse in its effects upon the integrity and completeness of the enumeration was the provision of the act of 1850, by which the United States marshals were left to appoint their assistants—the actual enumerators—without any check or control on the part of the Census Office. Whatever the vices of any individual appointment, or however low the general tone of appointments in any district might be, the Census Office had no power except that of a barren protest, its right to make such a protest even being seriously a subject of question. The Census Office had not even authority or appropriation to send an agent to inspect the office of the United States marshal during the progress of the enumeration.

The absence, as above indicated, of any power in the Census Office, first, over the appointment of the marshals themselves—the supervisors of enumeration; secondly, over the subdivision of the territory for the purposes of enumeration; and thirdly, over the appointment of assistant marshals—the actual enumerators—will be seen to justify the statement made above, that, under the act of 1850, the authority attached to the Census Office was insufficient to any considerable degree of responsibility for the results reported. In this condition, the question whether the census of any judicial district should be a good one or a bad one became a question simply whether the United States marshal, appointed with reference to altogether different considerations, was himself competent to conduct the delicate and difficult work of supervising the census; whether he would give to the subject sufficient time and attention, in spite of other and pressing duties, and whether he would show good judgment and integrity in the subdivision of his district and in the appointment of his assistants. I have always been free in attributing to the United States marshals of 1870, as a body, a high sense of their duty in this respect and great zeal and vigilance. In preparing for and supervising the enumeration the marshals for 1870, as a body, did far more and better than was to have been expected of them in respect to this onerous duty imposed upon them, in addition to the regular work of their office. Moreover, the assistant marshals of 1870 were generally of good clerical abilities and good character, who labored faithfully in their calling, and made, as a rule, neat and intelligent returns.

While the foregoing remarks respecting the deficiencies of the system in use at the Ninth Census apply indifferently to all the districts of the country, north and south, peculiar difficulties attended the enumeration at the south in 1870. The disturbed state of society in the states lately in rebellion and the supposed necessity of appointing the assistant marshals wholly from the dominant political party, the members of which, in some sections, were drawn almost exclusively from the race lately emancipated by the effects of war, combined to reduce to a very low point the assurance which the country could have of a good census being taken under such a thoroughly bad organization as that provided by the act of 1850. It is not necessary for me to recite facts of record showing the manner in which the state governments of more than one state were at that time administered to prove that there was no very

strong probability that the appointments made to the office of assistant marshal in those states would be uniformly good.

There was, moreover, lacking, in 1870, throughout this general region, one very important safeguard of enumeration, viz, public interest in the result and general intelligence as to the population likely to be shown by the canvass. The interest generally manifested throughout the United States in the Ninth Census was far below that which has been shown the present year; but nowhere did the interest in the work of the census fall as low as in the states referred to, in which political activity under the Constitution of the United States had scarcely revived, and some of which had only just been restored to their representation in Congress and in the electoral college. Public interest in the result of the enumeration is oftentimes very troublesome to the officers of the census; but it is as wholesome as troublesome, since while it frequently leads to unreasonable complaints, it almost certainly calls attention to any actual omissions from the enumeration and to any negligence on the part of the agents of the census.

Moreover, there could, in 1870, be no intelligent expectation at the south as to the population which should be shown by the census. No statistician could, at that time, claim to be able to make even an approximate estimate of the population of any southern state. What would be found to be the effects upon population of four years of devastating civil war, involving vast loss of life, with diminution of vitality on the part of the survivors, the separation of husbands and wives, and the procrastination of marriage on the part of the young, throughout a population of which all able-bodied adult males were declared by law to be soldiers, subject to be called to arms at any moment; what would be the effects upon the distribution of the colored population, as between states and counties, of their recent emancipation, leaving them for the first time free to place themselves according to their interest or their fancy; these were questions which the best informed student of population could not have presumed in 1870 to answer. There was, consequently, on the eve of the Ninth Census, no intelligent estimate possible on the part of any southern community as to the population which would be found to exist; and hence there could be no intelligent criticism of the results of the census as announced by the marshals of the several judicial districts. Scarcely any result as to population was incredible in a region over which armies had been passing for four years, to the destruction of crops, of houses, of fences, and of agricultural implements, and in which one-third, one-half, or, as in the so-called "Black belt," two-thirds, four-fifths, and even seven-eighths of the population were, for the first time in their lives, as the result of war, left free to choose their own location and mode of living.

INVESTIGATION OF THE RESULTS REPORTED IN 1880.

From the above considerations this office was not disposed, on the first announcement of the extraordinary apparent gain of population from 1870 to 1880, to conclude that it was necessarily the census of 1880 which was in fault, and thereupon to charge upon the ten thousand officers engaged in the service throughout the southern states the perpetration of a monstrous political crime through a gigantic conspiracy to falsify the census. Knowing that the provisions of law at the Tenth Census were indefinitely better suited to accomplish the purposes of a correct enumeration than in 1870; knowing that in South Carolina the work of supervision had not, as in 1870, been intrusted to a single officer already overworked in the performance of the regular duties of the marshal's office, but to three officers, each of whom gave many months of arduous labor to the work of preparation and supervision; knowing that in place of 121 enumeration districts, as in 1870, covering an average area of 280 square miles, there had been, at the recent count, 487 districts, each covering an average area of only 69 square miles, securing, as a necessary result, a far higher degree of local and personal knowledge on the part of the enumerators of the districts to be canvassed by them respectively; knowing that the enumerators were no longer chosen from a

single party, but were taken from the mass of citizens without any restriction on account of supposed partisan necessities; knowing all these things, I felt that the question, whether the census of 1870 or that of 1880 were in fault, should be approached and investigated without any strong presumption in favor of the former enumeration. The result of this investigation I have now the honor to state.

The method chosen for dealing with the question of the accuracy of the recent enumeration was a direct test of the count in certain districts. The districts taken for the purpose were, of course, among those situated in the counties respecting which the apparent gain from the Ninth to the Tenth Census was the most extraordinary. They were also, in general, the districts which exhibited the largest gains within their respective counties, though considerations of convenience in reaching such districts by public conveyance, and in testing the count with the assistance of officials and citizens of undoubted probity, were admitted in the selection of the districts to be so canvassed. For the purpose of this investigation, I detailed Mr. Henry Gannett, special agent. The honorable Attorney-General, at the request of this office, instructed the United States marshal of South Carolina to co-operate with Mr. Gannett in the work of investigation. Similar instructions were issued by the internal revenue department to the collector of internal revenue of the state of South Carolina, Mr. Brayton, and a general letter of introduction was addressed from the Post-Office Department to the route-agents of that department.

Mr. Gannett left Washington on the 7th of September, accompanied by Mr. R. M. Barnitz, one of the most capable clerks of this office, and returned to the city on the 21st of September. I inclose a copy of his report, showing his proceedings under this commission.

It appears that Mr. Gannett visited six counties of South Carolina, being counties which showed extraordinary gains since 1870, and in those counties visited in all eighteen enumeration districts. In each of these enumeration districts the list of inhabitants returned to this office were subjected to examination by United States officials or by citizens. In general, these citizens were introduced and vouched for by the United States marshal of the judicial district, or by the United States collector of internal revenue, as not only men of reputation, but, with two exceptions only, as also recognized members of the republican party. In each of the eighteen districts in succession the names of inhabitants were so far identified as to put it beyond a doubt, first, that the census of 1870 in each of these districts was grossly defective, and, secondly, that the census of 1880 was substantially well taken. In no instance did anything appear which bore the semblance of fraud in the returns made to this office by the enumerators of 1880. In some districts nearly every family was identified as resident in the township, notwithstanding the great extent of the South Carolina townships, some of which embrace one hundred and even two hundred square miles. In all cases the identification was carried far enough to put it beyond a doubt that the fault of the impossible gains reported over the census of 1870 lay with the preceding enumeration.

It appears to me that the report of Mr. Gannett satisfactorily settles the question as to the fairness of the Tenth Census in South Carolina. It must be remembered that no reason existed for suspecting that enumeration beyond the fact of the extraordinary gain over the reported population of 1870. The supervisors of South Carolina are men of unimpeached character. Two of them are republicans who were appointed upon the strong and urgent recommendation of United States officials resident within that state, and of other persons highly connected in the past with the republican party. Of one of them (Colonel Pride) the Hon. D. H. Chamberlain, late governor of South Carolina, wrote:

> He is a man of great energy, thoroughly acquainted with all parts of the state, apt and experienced in business affairs, with habits of accuracy and method which are of great value. He is a sincere southern republican, a member of that party in adversity as well as in prosperity. He is a good citizen, a good republican, and a good business man.

The third supervisor, a moderate democrat, is a man of the highest social connections and standing; a man of culture and of learning.

Not one complaint has ever reached this office respecting the general character of the enumerators appointed in any of the three supervisors' districts of South Carolina, or impeaching the fitness of a single enumerator appointed in that state. No specific allegation of fraud in the enumeration of South Carolina has ever been made to this office. The entire ground for impeaching the integrity of the recent census was found in the reported gain of population between 1870 and 1880. The results of the investigation hereinbefore detailed place beyond possible question by any fair-minded man the entire fault upon the census of 1870. I know of no reason, therefore, why any further charge should be made against the enumeration recently brought to a conclusion by the commissioned and sworn officers of the government in South Carolina.

The presumption which existed against their work has been completely overthrown, and a strong counter presumption has been created by the verification upon the ground of the schedules of inhabitants in the case of eighteen enumeration districts successively taken for special investigation on account of their exceptionally questionable character.

COMPARISON OF 1820–'60 WITH 1860–'80.

One further objection which has been brought against the reasonableness of the result of the census of 1880 in South Carolina deserves a brief notice.

That objection is derived from a comparison of the ratio of increase between 1820 and 1860 and that between 1860 and 1880. The population of South Carolina increased from 502,741 in 1820 to 703,708 in 1860, a gain of 40 per cent. in 40 years. Between 1860 and 1880 the increase was from 703,708 to 995,006, a gain of 41 per cent. in 20 years. Such a comparison, however, is not fair, without reference to certain general causes operating during the two periods.

From 1820 to 1860 South Carolina was a bee-hive, from which swarms were continually going forth to populate the newer cotton-growing states of the Southwest. Between 1820 and 1830 immense tracts of fertile lands belonging to the Creeks and Cherokees in Georgia were ceded to the United States, and were largely occupied by South Carolinians. Later in the period an active emigration of whites from South Carolina sprang up and was maintained in favor of Alabama, Mississippi, and Louisiana, while South Carolina negroes were sold in great numbers to cultivate the cotton, rice, and sugar fields of those states. Still later the annexation of Texas made further drafts upon the population of South Carolina.

The effect of these movements is seen in the following figures:

Number of persons born in South Carolina living in that state in 1870	678,708
Number of persons born in South Carolina, but living in other states of the Union in 1870	246,066

From which it appears that South Carolina had given to other states nearly 27 per cent. of her entire native stock. Of these there were living—

In Georgia	54,937
In Mississippi	35,956
In Florida	22,116
In Texas	17,717
In Arkansas	13,807

It is probable that these figures underrate the facts so far as the negro element is concerned, since it seems most likely that many negroes who were born in South Carolina, but who had been sent ten, twenty, or thirty years before 1870 to other states, would be returned as born in the states in which they were then found, the tradition of their origin being lost.

We do not yet know fully what effects the destruction of slavery and the vast change resulting in the conditions of labor have produced upon the emigrating propensities of the people of South Carolina. We do know that negroes are no longer sold South to cultivate the lands of the Yazoo, the Red river, and the Brazos. It is

reasonable to suppose that concurring causes may have checked in an equal degree the outward movement of the white population. A comparison of the "free" natives of South Carolina living in other states in 1860 with the white natives of South Carolina living in such states in 1870 shows their numbers to have been, respectively, 193,389 and 148,574, a reduction of 45,000 in the ten years between 1860 and 1870.

Very respectfully, your obedient servant,

FRANCIS A. WALKER,
Superintendent of Census.

WASHINGTON, D. C., *September* 28, 1880.

Hon. FRANCIS A. WALKER,
Superintendent of Census.

SIR: In accordance with your instructions I proceeded to South Carolina, accompanied by Mr. R. M. Barnitz, of the Census Office, arriving in Greenville, Greenville county, on the morning of Thursday, the 8th of September.

The plan which I adopted, in obtaining direct evidence for or against the general correctness of the census in this state was to visit personally the counties in which the gains reported since 1870 appeared most suspicious, and in such counties to visit as many townships showing gains above the average as was consistent with the time allowed for the investigation, and in these townships, by the aid of reliable persons well acquainted with the population, to identify, as far as possible, the heads of families appearing upon the census schedules, and, in a considerable portion of cases, also to identify the individual members of such families.

As the townships of South Carolina are of very great extent, embracing on an average not less than 80 square miles, and in many instances not less than 100 or 150, and in some cases even 200, square miles, and not unfrequently embracing three, four, or five thousand inhabitants, it was not to be expected that every family could be identified without traversing the whole extent of such townships, which would involve, perhaps, two or three days' labor. It was, however, believed to be possible, by consulting persons specially familiar with the population, to secure the identification of the great majority of the families recorded in the census, in case no fraud had been committed in the enumeration. There might still remain more or fewer families on the outskirts of the township who might not be personally known to any one who could be conveniently consulted at the principal village or villages. It was, however, my purpose not in any case to stop in the identification of persons reported on the census schedules short of the point necessary to determine the substantial accuracy of the recent enumeration. Thus, for instance, in the case of a township having, according to the census of 1870, 1,500 inhabitants, but in which 3,000 persons were recorded in the census of 1880, if 2,950 persons could be in one day identified with assurance, all presumption against the census of 1880, by reason of the reported gain of 100 per cent. in ten years, would be effectually removed, and the identification of the remaining 50 names upon the schedule would become only a work of curiosity, which might consume another day, which could be better occupied in the investigation of a second township.

In Greenville I met Colonel R. M. Wallace, United States marshal, who kindly gave me every assistance in his power, giving me his time, placing his deputies entirely at my service, and allowing me the use of his office.

I examined, first, the townships of Oaklawn and Grove, in Greenville county. The population of these townships in 1870 and 1880 was as follows:

	1870.	1880.	Increase.	Per cent.
Oaklawn	995	1,681	686	69
Grove	1,089	2,361	1,272	117

Mr. John Scruggs, a deputy marshal and a republican, identified a large proportion of the families in these townships. Although this verification was sufficiently complete to show that no great error could exist, I decided to visit these townships in person, where, by the aid of a colored republican and a Mr. Pearson, a moderate democrat introduced to me by Mr. Scruggs, every person, excepting 46 in Grove and 19 in Oaklawn, was accounted for. Of those not recognized, there were but half a dozen whose names were strange to my informants.

Gantt township, Greenville county, had a population in 1870 and 1880 as follows:

1870	844
1880	1,731
Increase	887
Increase, per cent	105

It was verified by Mr. John Scruggs. There were but 7 families whose names he did not recognize as belonging in the township.

Greenville township, Greenville county, was verified by the aid of several colored men brought to me by Colonel R. M. Wallace. The population of this township was reported in 1870 as 378, and in 1880 2,152. About 90 per cent. of the families were positively identified, and of those not identified there were very few whose names were strange to my informants.

The white population of Wagner township, Oconee county, was verified by Mr. Bryce (white), who identified all but 27 families.

The colored population was verified by Mr. Jenkins (colored), who recognized all but 12 families. Both of these men are republicans, and were brought to me by Colonel Wallace.

The population of this township in 1870 and 1880 was returned as follows:

	White.	Colored.	Total.
1870	1,529	453	1,982
1880	2,380	867	3,247
Per cent. of increase	56	91	64

Having heard that 600 names had been surreptitiously added to the schedules of Pickens county, I sent for the postmaster at Pickens Court-House, Mr. A. M. Folger, and for the enumerator of the one hundred and thirty-third district, Mr. E. H. Barton, both republicans, with whom I understood that the report had originated. Upon inquiry I found that it was due simply to a discrepancy between two newspaper statements, and that the smaller represents the population as reported in the census.

I learned from Mr. Folger that five out of the eight enumerators of Pickens county were republicans, the other three being democrats. The enumerators of this county were recommended for appointment by Mr. Folger.

The estimate made by Colonel Wallace of the population of Spartanburgh Court-House exceeded by 500 the population returned. The population in 1870 was said to be 1,080, and in 1880 3,253.

From Greenville I proceeded to Columbia and called there upon Mr. E. M. Brayton, collector of internal revenue, who immediately placed his force at my service, gave me a room in the internal-revenue building, and rendered other very important aid.

Shortly after my arrival at Columbia I met Colonel C. J. Pride, supervisor first district, who came in response to my telegram. He is a native of South Carolina, a planter, and a moderate, but undoubted, republican in politics. Unless I am a very poor judge of men, he is perfectly honest and incapable of being used by politicians. His appointments were evidently made without regard to party, and in many cases without knowledge on his part of the politics of the appointees. Of the enumerators 37 were known to be republicans, 67 known to be democrats, and the political preferences of 66 were unknown.

It has been charged by certain republicans that Mr. Pride had appointed but one republican, and that his appointments in Edgefield county were made upon the solicitation of prominent democrats. Without knowing of this charge, Mr. Pride stated that democratic politicians had nothing whatever to do with his appointments; that on the contrary he had refused to make the appointments recommended to him in this county, and had appointed men on the recommendation of W. D. Ramey, a republican of Edgefield Court-House, who himself enumerated Pickens township. I was subsequently able to verify this statement of Mr. Pride.

Shortly after Mr. Pride's arrival, Mr. J. L. Breeden, supervisor third district, called upon me in response to a telegram. I obtained from him similar facts regarding his appointments, and have no reason whatever to suppose that the democratic politicians of South Carolina had anything to do therewith. Mr. Breeden is a moderate republican, and has every appearance of being an honest, straightforward man. His appointments were evidently made without distinction of party, 28 being known to be republicans, 35 known to be democrats, the political preferences of 79 being unknown.

As Mr. Breeden was well acquainted in his own county (Marlborough), I requested him to verify Brightsville township. He identified all but seven families of the whites, and nearly all of the colored population.

I had sent to Edgefield county for parties to verify certain townships of that county, among them Mr. Lawrence Kane, who took the census of Pickens township in 1870, and Mr. M. W. Watson, a deputy marshal, both republicans. At the request of Mr. Pride I sent also for Mr. W. D. Ramey, enumerator of Pickens township. Mr. Kane identified the greater part of Pickens and Wise townships, and Mr. Watson about the same proportion of Norris township.

Not feeling satisfied with this result, although it showed a vast undoubted increase over the population returned in 1870, I visited the county personally, and, by the aid of colored republicans, identified all but 5 white families, consisting of 23 persons, and all but 7 per cent. of the blacks in Pickens township, and all but 5 white persons and one-tenth of the blacks in Wise township. By the aid of Mr.

Watson, sr., all but 2 families of the whites, comprising 15 persons, and 9 families of the blacks, comprising 55 persons, in Norris township, were identified.

The following are the populations of these townships at the two censuses:

	1870.	1880.	Per cent. increase.
Pickens	1,559	3,939	156
Wise	1,845	2,830	53
Norris	1,485	2,958	100

I also obtained a statement of the total vote in the democratic primaries in this county. There is no suspicion of fraud in these elections, and parties are divided sharply on the color line, there being not more than half a dozen white republicans in the county, while no negroes are allowed to vote at these elections. Out of 3,468 white voters in the county, as shown by the schedules of this census, 3,300 votes were cast at the primary; a tolerably convincing proof that the white population has been correctly enumerated.

Besides the above, I made a partial and superficial examination of three other townships, those of Collins, Colliers, and Mobley. In these, four-fifths of the white population were quickly identified, while very few of the names were unfamiliar to my informants.

The apparent increase of these townships is shown in the following table:

White population.

	1870.	1880.	Per cent. increase.
Collins township	303	546	80
Colliers township	252	354	40
Mobley township	456	1,398	204

I did not follow up the identification of the names in these townships, as I had, as it appeared to me, sufficient evidence regarding this county, which has been regarded by those who were disposed to impeach the census of 1880 as the one most liable of all to fraud. Persons well acquainted with South Carolina expressed themselves as willing to accept the result of the investigation in this county as conclusive for the state.

While I was absent in Edgefield, Mr. Barnitz examined the enumeration districts of De Kalb township, and the town of Camden, in Kershaw county, by the aid of Mr. J. A. Boswell, a republican recommended by Mr. Brayton. These districts had the following population at the two censuses:

	1870.	1880.	Per cent. increase.
De Kalb township	1,571	6,088	288
Camden township	1,007	1,780	77

Mr. Boswell identified in De Kalb township all but 14 families, containing 62 persons; and in Camden all but 5 families, containing 13 persons.

Upon my return from Edgefield, I found Major Harry Hammond, supervisor of the second district, awaiting me. He is a highly educated gentleman, a planter, and a moderate democrat. Of his appointees, all but one are democrats, so far as he knew their political preferences. Mr. Hammond appeared anxious for a full investigation of his district.

I immediately proceeded to Orangeburgh Court-House, accompanied by him, and spent a day at the court-house on the schedules.

The townships of Hebron and Liberty were verified by Mr. J. H. Livingston, sheriff of the county and an undoubted republican, with the result of but four families in one, and five in the other, unaccounted for.

Mr. George Boliver, clerk of court and a republican, examined the town of Orangeburgh Court-House, and identified every family and nearly every individual. He found no errors except two or three cases of duplication and of enumeration of families living outside of the corporate limits, all of which were plainly unintentional errors.

Orange township was verified to the extent of about 90 per cent. by Messrs. George and Jacob Boliver. This investigation was stopped simply for want of time.

In 1870 the total population of Orangeburgh Court-House was returned as 246, while the registration at the election in 1868 was over 300. In 1878 the registration was 182 whites and 156 colored, a total vote of 338.

The following are the populations of the above districts of Orangeburgh county as returned by the two censuses:

	1870.	1880.	Per cent. increase.
Orange township	997	3,906	292
Hebron township	311	960	209
Liberty township	408	1,215	198
Orangeburgh Court-House	246	2,140	770

Upon the conclusion of my examination of Orangeburgh county, believing that I had made a sufficient examination to prove the general accuracy and correctness of the census of this state, I returned to Washington.

In addition to the identification of the heads of families, the individual members of families, especially in those which were extraordinarily large, were verified as far as time would serve. I found no ground whatever for suspicion that families had been fraudulently increased in the returns. Comparatively few negroes knew their own ages, or those of their children, and this ignorance extends to some extent to the lower classes of the whites—a fact which sufficiently explains many seeming inconsistencies in the succession of the children in certain suspicious-looking families.

As you have noticed, I have called upon republicans almost everywhere to assist me. I found them at first thoroughly convinced of the fraudulency of the census. I left them convinced to the contrary. In the few cases where I was obliged to use democrats, I took the precaution invariably of testing their good faith. My informant was not allowed to see the schedules, but the names were called off to him. Occasionally I called names that were not on the schedules, but these were never recognized. I also asked frequently for details regarding names and ages of members o families, and business or profession, which could only be given by one well acquainted with the family, and false answers were never returned.

In short, I had no occasion to question the correctness or accuracy of the information furnished, excepting in the case of a colored republican who attempted to identify the people of Orange township, in Orangeburgh county. I discovered that while he had no intention to deceive me, his complaisance was leading him away from the truth, and I dispensed with his services forthwith.

In all, eighteen enumeration districts, distributed among the counties of Greenville, Oconee, Edgefield, Kershaw, Marlborough, and Orangeburgh, have been examined in detail. These districts were selected as being those in which there is the greatest discrepancy between the results of the two censuses—a discrepancy ranging from fifty up to several hundred per cent. No district was examined in which the number identified was not sufficient to show that it was the census of 1870 and not that of 1880 which was in fault.

I have found no trace whatever anywhere of any attempt at a fraudulent inflation of the census. Not only does the direct evidence disprove the charge, but the collateral evidence also is against it. A large number of the enumerators of 1880 were undoubtedly republicans, and the increase in their districts is as large as in those enumerated by democrats. I have had many facts showing painstaking accuracy on the part of the enumerators.

Some minor errors have been detected, but they are of no consequence in this connection. Families living near the borders of two townships have, in a few instances, been duplicated. An occasional duplication within the same township has also been found; but these are plainly mere errors, and they form but a minute fraction of the population. In some cases enumerators used note-books in the field instead of the schedulas, copying their work afterward, for the purpose of keeping it clean and neat. Also it seems to have been a common practice to obtain from the planters the names, etc., of the families living as tenants upon their places. While this practice is irregular, it must be admitted that in many instances the data could be better obtained in this way than from the tenants themselves, owing to the ignorance of the latter.

This investigation has shown to me that not only has there been no attempt at fraud, but that the census has been on the whole remarkably well taken, when the character of the people and of the territory is taken into account, and that the work reflects great credit upon the gentlemen who supervised it.

The Tenth Census of this state being thus shown to have been substantially correct, and there having been but very little immigration since 1870, it appears conclusively that the Ninth Census must have been incorrectly returned, since the natural increase cannot possibly account for more than a small fraction of the gain. As a general rule, with, however, some exceptions, the population of the larger towns has increased but slightly, while the great apparent gains have been made in the country, and particularly where the negroes are in the majority, and where, from mountains or swamps, it is difficult to get about. This distribution of the increase, in connection with the known general character of the enumerators in 1870, and with the rates of compensation (per capita and mileage), is suggestive.

The enumerators of 1870 were largely colored men, and more or less ignorant. The universal testimony obtained from republicans who were not enumerators in that census is that the names were obtained at court sessions, at musters, and other like occasions, where considerable portions of the population were brought together, and not by a house-to-house canvass. Deputies were generally, if not universally, appointed by the marshal, in contravention of law and of sound policy, for entire counties, and these in turn frequently farmed the work out by townships to others.

In the case of Orangeburgh county, a comparison of the figures of the Eighth and Ninth Censuses is conclusive against the latter. In 1860 the population was 24,896, and in 1870, 16,865, a falling off of 8,031, or 32 per cent. No other county in the state shows anything like this decrease, and there was no possible reason why Orangeburgh should suffer more than other counties.

Comparisons between the population returned by the Ninth Census and the total vote cast at elections held about that time show great discrepancies in all parts of the state.

In further corroboration of the correctness of the census of 1880 may be adduced the despised state census taken in 1875. Although this was at the time condemned and the results were never officially published, recent developments give it considerable importance.

This census is appended by counties, in connection with the Ninth and Tenth United States censuses.

Counties.	1880.	1875.	1870.
Abbeville	40, 822	38, 968	31, 129
Aiken	28, 122	30, 304	.....
Anderson	33, 613	29, 127	24, 049
Barnwell	39, 858	37, 523	35, 724
Beaufort	30, 190	43, 062	34, 359
Charleston	102, 825	123, 489	88, 863
Chester	24, 153	24, 227	18, 805
Chesterfield	16, 345	13, 826	10, 584
Clarendon	19, 190	16, 243	14, 038
Colleton	36, 390	33, 883	25, 410
Darlington	34, 485	30, 461	26, 243
Edgefield	45, 846	35, 039	42, 486
Fairfield	27, 766	22, 791	19, 888
Georgetown	19, 613	17, 646	16, 161
Greenville	37, 494	32, 706	22, 262
Hampton	18, 767	.....	.....
Horry	15, 574	12, 012	10, 721
Kershaw	21, 538	20, 902	11, 754
Lancaster	16, 903	14, 735	12, 087
Laurens	29, 444	26, 405	22, 536
Lexington	18, 590	16, 613	12, 988
Marion	34, 107	31, 654	22, 160
Marlborough	20, 598	17, 683	11, 814
Newberry	26, 497	23, 326	20, 775
Oconee	16, 256	14, 075	10, 536
Orangeburgh	40, 995	34, 070	16, 865
Pickens	14, 391	11, 807	10, 269
Richland	28, 585	34, 245	23, 025
Spartanburgh	40, 408	32, 184	25, 784
Sumter	37, 037	31, 480	25, 268
Union	24, 081	21, 965	19, 248
Williamsburgh	24, 110	21, 055	15, 489
York	30, 713	31, 633	24, 286
Total for the state	995, 306	925, 145	705, 606

It will be seen that the state census accorded much more closely with that of 1880 than with that of 1870. This census was taken under republican management by republican officials.

In conclusion, I desire to thank you for the confidence you have shown by intrusting this important work to me, and to express the hope that it will be found to have been done in a satisfactory and thorough manner.

I am, sir, very respectfully,

HENRY GANNETT

Geographer and Special Agent Tenth Census.

DEPARTMENT OF THE INTERIOR, CENSUS OFFICE,
Washington, D. C., January 25, 1881.

Hon. FRANCIS A. WALKER,
Superintendent of Census.

SIR: I have the honor to submit the following report of the results of the re-enumeration of certain townships in the state of South Carolina, made by special agents under my charge, for the purpose of testing the accuracy of the census of that state, taken in the month of June, 1880.

In compliance with your instructions, I left Washington for Columbia, South Carolina, on the 19th of November, 1880. Previous to my departure, Messrs. J. B. Burt, O. P. D. Stone, J. B. Isler, and T. Quinn reported to me for duty, and accompanied me to South Carolina.

I reached Columbia on the evening of the 20th, and at once put myself in communication with Mr. E. W. Brayton, collector of internal revenue, and Colonel R. M. Wallace, United States marshal of South Carolina. Collector Brayton very kindly furnished me with an office in the United States court-house, and promptly volunteered everything in the way of information, accommodation, and assistance which I might require.

On the following day Colonel Wallace arrived from Charleston. Under your instructions eight townships were to be selected for re-enumeration by Colonel Wallace. On his recommendation the following were chosen for that purpose:

Due West, Abbeville county.
No. 8, Fairfield county.
Waterloo, Laurens county.
Williston, Barnwell county.
Broad River, Lexington county.
Steerpen, Chesterfield county.
Cains, Marion county.
Johnson, Williamsburgh county.

In the selection of these townships several points were taken into consideration:

1. The extraordinary gains reported in them during the last decade.

2. By those best acquainted with the townships in question, no satisfactory theory accounting for such gains could be devised.

3. These townships were widely scattered throughout the state, and only one taken from a county; and, lastly, they were all in other counties than those examined during a previous investigation conducted by Mr. Gannett, of your office.

It will also be observed that these townships compose a portion of each of the three supervisors' districts of South Carolina.

The following table shows the population of these townships in 1870 and 1880, and the extraordinary gains reported in them:

Townships.	1870.	1880.	Increase.	Per cent.
First supervisor's district:				
Due West, Abbeville county	1,030	2,457	1,427	139
No. 8, Fairfield county	1,562	2,559	997	64
Waterloo, Laurens county	2,158	4,018	1,860	86
Second supervisor's district:				
Williston, Barnwell county	1,379	2,669	1,290	94
Broad River, Lexington county	1,116	2,426	1,310	117
Third supervisor's district:				
Steerpen, Chesterfield county	545	2,080	1,535	282
Cains, Marion county	1,007	2,405	1,398	139
Johnson, Williamsburgh county	1,218	2,397	1,179	97
Total	10,015	21,011	10,996	.....
Average per cent. of increase	.....	.....	.....	127

The designation of these townships being made, the force under my charge were at once sent to their respective places of operation.

I assigned to Major J. B. Burt, Broad River and No. 8; to Mr. O. P. D. Stone, Steerpen and Cains; to Captain J. B. Isler, Williston and Johnson; and to Colonel Timothy Quinn, Due West and Waterloo.

Instructions were given to each one of these gentlemen to collect the following data:

First. Description and location of house.
Second. Names of the inhabitants.
Third. Color.

Fourth. Sex.

Fifth. Age (and in case of children less than one year old the number of months to be given).

Sixth. Avocation of heads of families.

The re-enumeration to be of present date.

They were particularly enjoined to find and visit every house in the townships canvassed. To this end they were instructed, whenever necessary, to provide themselves with horses, and guides well acquainted with the localities, as in the country the houses are very much scattered, being away from the main roads, in the woods, and on bridle-paths; and also, as the boundaries of townships are in many cases merely arbitrary lines, to exercise the greatest care in following them.

Immediately on my arrival in Columbia, I had communicated with the three supervisors of census, asking them to fix a time and place at which I might meet each of them. In response to a telegram from Major Harry Hammond, supervisor of the second district, I met him on the 28th of November at Augusta, Georgia, which is near his place of residence. Major Hammond met me with the greatest courtesy, and at once proffered me every assistance in his power to facilitate my investigations. By letters to the enumerators and leading men in the township, he rendered efficient aid to the special agents assigned to his district.

Receiving a telegram from Hon. J. L. Breeden, supervisor of the third district, offering to meet me at any point I might designate, and tendering his services in any way which I desired, I took the liberty to ask him to meet Mr. Stone at Cheraw, near Mr. Breeden's home, and give him such information and assistance as he might require, to which he cheerfully responded, and rendered valuable assistance to the gentlemen sent to his district.

Soon after my return from Augusta, Colonel Pride, supervisor of the first district, called upon me in Columbia, remaining in the city several days. Colonel Pride placed at my disposal all the records in his supervisor's office, and very kindly did everything in his power to facilitate the work in his district.

On the 8th of December the canvass of the first township was completed, others following at intervals, the last being finished on the 7th of January.

Upon the receipt of the results of the field-work, I proceeded in private to make the necessary comparisons between the re-enumeration and the June schedules, which, in the meantime, I had received from your office.

The following table will show the aggregates of the two enumerations, and an increase since June, 1880:

Locality.	June enumeration.	Re-enumeration.	Increase since June.
Due West	2,457	2,576	119
No. 8	2,559	2,685	126
Waterloo	4,018	4,150	132
Williston	2,669	2,723	54
Broad River	2,426	2,441	15
Steerpen	2,080	2,090	10
Cains	2,405	2,480	75
Johnson	2,397	2,463	66
Total	21,011	21,608	597

The following table will show the results of the comparisons:

Locality.	June enumeration.	Re-enumeration.	Increase since June.	Names common to both schedules.	Names on June schedule not found by re-enumeration.	Names found by re-enumeration not on June schedule.
Due West	2,457	2,576	119	2,215	242	361
No. 8	2,559	2,685	126	2,320	239	365
Waterloo	4,018	4,150	132	3,673	345	477
Williston	2,669	2,723	54	2,394	275	329
Broad River	2,426	2,441	15	2,158	268	283
Steerpen	2,080	2,090	10	1,942	138	148
Cains	2,405	2,480	75	2,232	173	248
Johnson	2,397	2,463	66	2,152	245	311
Total	21,011	21,608	597	19,086	1,925	2,522

It follows, from an examination of these tables, that the gain since June is 597, or nearly 2⅞ per cent.; also nearly 91 per cent. of the names on the June schedules were found by the special agents still living in their respective townships. I think I am justified in accounting for the large gain since June from two causes:

First. The legitimate increase from natural causes, that is, excess of births over deaths. It appears, from the schedules of re-enumeration, that the births since June, 1880, are 436, which is something over 2 per cent. of the population reported in June, and this for the six months intervening between the two enumerations. This is somewhat above the percentage usually conceded to be an average by compilers of statistics on this subject.

Second. It is to be expected that special agents, selected for their known capacity and experience in census work, would make a more thorough and exhaustive enumeration than gentlemen to whom the work was entirely new, no matter how strict their integrity and honest their intentions.

Especially would this be true since the special agents were instructed to procure the best attainable guides, maps, and all the available helps to make their work complete; furthermore, in most cases, in the work of recanvassing the townships, by the courtesy of the officers connected with the June enumeration, the enumerators accompanied the special agents, who thus had the advantage of their own experience and that of the enumerators.

It must therefore be plainly probable that a considerable number of persons are included in the re-enumeration who were overlooked in June.

As above stated, nearly 91 per cent. of the names are common to both schedules, leaving a fraction over 9 per cent., or 1,925 names, which I was unable to verify.

This number is divided among the white and colored population as follows:

Locality.	White.	Colored.	Total.
Due West	109	133	242
No. 8	80	159	239
Waterloo	109	236	345
Williston	82	193	275
Broad River	93	175	268
Steerpen	80	58	138
Cains	90	83	173
Johnson	82	163	245
Total	725	1,200	1,925

The failure to verify this number may be attributed to the ordinary movement of population, in part, but largely to the well-known custom among the colored population of a frequent change of name. As regards the movement of population, several circumstances unite to form an explanation why in this case it should be large.

In several of these townships are turpentine distilleries, the laborers in which are mainly composed of what may be termed "floating population".

Between the two enumerations occurred the season of cotton-picking, which, in a cotton-growing locality, invariably occasions considerable changing about of laborers and their families.

In one of the townships, Due West, are located three quite extensive educational institutions, the students in which were included in each enumeration.

In that township I find on the June schedules the names of 43 students, all white, which could not be verified.

It is a well-known fact that in all such institutions, to a certain degree, changes are continually taking place.

By reference to the foregoing table it will be seen that this number comprises nearly one-half the white population not verified in that township.

Near another of the townships is a cotton-factory, which the special agent assigned to that locality assures me had no inconsiderable influence in producing movement of population.

How materially the frequent change of names among the colored race increased the difficulty of the verification is strikingly illustrated by a subsequent critical examination made in the township of Johnson, where, by the aid of the June schedules, one hundred and fifty-one additional names were verified, of which one hundred and thirty were of colored people.

Taking all the facts into consideration, I feel justified in saying that 91 per cent. is a very close verification.

Having arrived at the above results, acting under your instructions, I selected the township of Johnson, in which to make a still more searching test of the correctness of the previous enumeration.

Accordingly, I prepared a transcript of the names appearing on the June schedules for that township, not verified, and dispatched Captain J. B. Isler to that place, with directions to institute a strict inquiry for the parties bearing those names to verify their existence or non-existence, on the 1st day of June, 1880, by sworn testimony from respectable citizens.

In this matter I was very materially aided by Major Harry Noah, of the internal-revenue service, who is secretary of the state republican committee, who kindly gave Captain Isler letters to the chairman of the county republican committee, and other leading republicans in the county. I also communicated with Colonel Wallace in regard to the matter, and am able to say that the parties making the affidavits which accompany this report are fully indorsed as being honorable men, and entitled to the fullest confidence.

The result of Captain Isler's efforts fully justified my expectations. By the aid of the transcript from the June schedules he was able, out of a list of two hundred and forty-five, to verify one hundred and fifty-one additional names, leaving ninety-four still to be accounted for.

Herewith you will find affidavits, in proper and legal form, showing that, of the ninety-four not found by the re-enumeration, eighty have removed from the township and thirteen have died since June 1, 1880.

This leaves a discrepancy of one, in explanation of which I have to say that one name is duplicated on the June schedule, so that in the township of Johnson, every name which appears on the June schedules is exactly accounted for.

I believe, if time would have permitted, the same result could have been reached in each of the other seven townships.

Having completed the work assigned me, I returned to Washington, arriving on the evening of January 16.

My investigation of the census of South Carolina has led me to the conclusion that it was correctly taken. I have discovered no trace or indication of fraud whatever, and, far from being a corrupt census, I firmly believe it to have been taken carefully and honestly.

In conclusion, I desire to say that I was received and treated with uniform courtesy and kindness by the people of South Carolina. Every facility was afforded me for the prosecution of the investigation. Particularly did those connected with the June enumeration cheerfully render their assistance, both to myself and the special agents associated with me, whenever circumstances made it possible to do so.

From Colonel R. M. Wallace, United States marshal, Mr. E. W. Brayton, collector of internal revenue, and Major Harry Noah, secretary state republican committee, my force and myself received many favors and valuable assistance.

The gentlemen detailed to assist in this work as special agents have done their duty with promptitude and fidelity, and merit my hearty commendation.

Trusting that this work may prove to have been satisfactorily done, I am,

Very respectfully, your obedient servant,

F. G. BUTTERFIELD,
Special Agent Tenth Census.

THE STATE OF SOUTH CAROLINA,
Williamsburgh county:

I hereby certify that Joseph W. Kimball is a duly commissioned trial justice for the county of Williamsburgh, state aforesaid.

[SEAL.]

J. H. KEELS,
C. C. P. and G. S.

STATE OF SOUTH CAROLINA, *Williamsburgh county, Johnson township:*

At Johnsonville, in said county, on this 10th day of January, 1881, personally appeared before me, Joseph W. Kimball, a trial justice within and for said county, R. H. Kimball, whom I certify to be of good repute, who, being duly sworn, deposes and says, that—

Name.	Color.	Sex.	Age.	Remarks.
Falker, H. M	W.	F.	25	Wife of I. E. Falker.
Falker, C. H	W.	M.	3	Son of H. M. Falker.
Falker, O. E	W.	M.	1	Son of H. M. Falker.
Smith, W. G	W.	M.	30	Laborer.
Smith, M. E	W.	F.	18	Wife.
Smith, W. D	W.	M.	1	Son.
Scott, Amelia	W.	F.	42	Wife of W. H. Scott.
Scott, I. G	W.	F.	1	Daughter of Amelia Scott.
White, Legrand, jr	W.	M.	19	Son of Amelia Scott.
Keffi, Allen	W.	F.	18	Daughter of Amelia Scott.
White, S. I	W.	F.	18	Wife of Legrand W. White.
White, Lilly	W.	F.	1	Daughter of Legrand W. White.
Hazelton, S. N	W.	M.	28	Farmer.

TABLE IV.—*Density of population.*

NOTE.—The figures of this table have been obtained by dividing the population by the total land area of the state or territory. The discrepancies between these results and those published in the *Statistical Atlas* of 1874 are due to differences in the estimates of areas used.

TABLE V.—*The urban population of the United States,* 1790 *to* 1880.

Date.	Population of United States.	No. of cities.	Population of cities.	Inhabitants of cities in each 100 of the total population.
1790	3, 929, 214	6	131, 472	3. 3
1800	5, 308, 483	6	210, 873	3. 9
1810	7, 239, 881	11	356, 920	4. 9
1820	9, 633, 822	13	475, 135	4. 9
1830	12, 866, 020	26	864, 509	6. 7
1840	17, 069, 453	44	1, 453, 994	8. 5
1850	23, 191, 876	85	2, 897, 586	12. 5
1860	31, 443, 321	141	5, 072, 256	16. 1
1870	38, 558, 371	226	8, 071, 875	20. 9
1880	50, 155, 783	286	11, 318, 547	22. 5

THE CENTER OF POPULATION.

The center of population, as defined in the *Statistical Atlas* of 1874, "is the point at which equilibrium would be reached were the country taken as a plane surface, itself without weight, but capable of sustaining weight, and loaded with its inhabitants, in number and position as they are found at the period under consideration, each individual being assumed to be of the same gravity as every other, and consequently to exert pressure on the pivotal point directly proportioned to his distance therefrom." In brief, then, it is the center of gravity of the population of the country.

THE CENTER OF POPULATION IN 1880.

Latitude, 39° 04′ 08″
Longitude, 84° 39′ 40″

The position of the Old Observatory, Mount Adams, Cincinnati, is: Latitude, 39° 06′ 26.5″; longitude, 84° 29′ 45″.

The center of population for 1880 is, therefore, 2.6 miles south of this observatory and 8.9 miles west of it. That is, it is 9.3 miles west by south from the observatory, or 8 miles west by south from the heart of the city of Cincinnati. This places it in Kentucky, one mile from the south bank of the Ohio river, and one and a half mile southeast of the village of Taylorsville.

TABLE VI.—*Distribution of population by drainage basins.*

Drainage basins.	Approximate area, square miles.	Population, 1880.	Population per square mile, 1880.
ATLANTIC OCEAN	2,178,210	48,717,293	22.4

Crenshaw	11,726	11,156	.....	
Cullman	6,355	.....	.....	In 1877, from parts of Blount, Marshall, Morgan, and Winston.
Dale	12,677	11,325	12,197	
Dallas	48,433	40,705	33,625	In 1875, part to Chilton.
De Kalb	12,675	7,126	10,705	
Elmore	17,502	14,477	.....	In 1877, part from Montgomery.
Escambia	5,719	4,041	.....	
Etowah	15,398	10,109	.....	
Fayette	10,135	7,136	12,850	
Franklin	9,155	8,006	18,627	
Geneva	4,342	2,959	.....	
Greene	21,931	18,399	30,859	
Hale	26,553	21,792	.....	
Henry	18,761	14,191	14,918	
Jackson	25,114	19,410	18,283	
Jefferson	23,272	12,345	11,746	
Lamar	12,142	8,893	.....	Since 1870, name changed from Sanford to Lamar.
Lauderdale	21,035	15,091	17,420	
Lawrence	21,392	16,658	13,975	
Lee	27,262	21,750	.....	
Limestone	21,600	15,017	15,306	
Lowndes	31,176	25,719	27,716	
Macon	17,371	17,727	26,802	
Madison	37,625	31,267	26,451	
Marengo	30,890	26,151	31,171	
Marion	9,364	6,059	11,182	
Marshall	14,585	9,871	11,472	In 1877, part to Cullman.
Mobile	48,653	49,311	41,131	
Monroe	17,091	14,214	15,667	
Montgomery	52,356	43,704	35,904	In 1877, parts to Bullock and Elmore.
Morgan	16,428	12,187	11,335	In 1821 name changed from Cataco to Morgan; in 1877, part to Cullman.
Perry	30,741	24,975	27,724	
Pickens	21,479	17,690	22,316	
Pike	20,640	17,423	24,435	
Randolph	16,575	12,006	20,059	
Russell	24,837	21,636	26,592	
Saint Clair	14,462	9,360	11,013	
Shelby	17,236	12,218	12,618	
Sumter	28,728	24,109	24,035	
Talladega	23,360	18,064	23,520	In 1877, part from Clay.
Tallapoosa	23,401	16,963	23,827	
Tuscaloosa	24,957	20,081	23,200	
Walker	9,479	6,543	7,980	
Washington	4,538	3,912	4,669	

TABLE XVIII.—*Aggregate population by counties*—ALABAMA—Continued.

Counties.	1880.	1870.	1860.	Remarks.
Wilcox	31,828	28,377	24,618	
Winston	4,253	4,155	3,576	In 1850 name changed from Hancock to Winston; in 1877, part to Cullman.

ARIZONA TERRITORY.

[Organized as a Territory February 24, 1863.]

The Territory	40,440	9,658	6,482	
Apache	5,283	.....	.....	In 1879, from part of Yavapai.
Maricopa	5,689	.....	.....	In 1871, from part of Yavapai; in 1873, part from Pima; in 1875, part to Pinal. Boundaries changed in 1877.
Mohave	1,190	179	.....	
Pima	17,006	5,716	.....	In 1873, part to Maricopa; in 1877, part to Pinal.
Pinal	3,044	.....	.....	In 1875, from parts of Maricopa, Pima, and Yavapai; in 1877, part from Pima.
Yavapai	5,013	2,142	.....	In 1871, part to Maricopa; in 1875, part to Pinal; in 1879, part to Apache.
Yuma	3,215	1,621	.....	

ARKANSAS.

[Organized as a Territory March 2, 1819; admitted as a State June 15, 1836.]

The State	802,525	484,471	435,450	
Arkansas	8,038	8,268	8,844	In 1871, part to Lincoln.
Ashley	10,156	8,042	8,590	
Baxter	6,004	.....	.....	In 1873, from parts of Fulton, Izard, Marion, and Searcy.
Benton	20,328	13,831	9,306	
Boone	12,146	7,032	.....	
Bradley	6,285	8,646	8,388	In 1873, part to Dorsey.
Calhoun	5,671	3,853	4,103	
Carroll	13,337	5,780	9,383	
Chicot	10,117	7,214	9,234	In 1879, part to Desha.
Clark	15,771	11,953	9,735	In 1872, part to Hot Spring; in 1873 and 1876, parts to Pike.
Clay	7,213	.....	.....	In 1873, from parts of Greene and Randolph.
Columbia	14,090	11,397	12,449	In 1871, part to Nevada.
Conway	12,755	8,112	6,697	In 1873, part to Faulkner and part from Perry.
Craighead	7,037	4,577	3,066	
Crawford	14,740	8,957	7,850	
Crittenden	9,415	3,831	4,920	In 1873, parts to Lee and Saint Francis.
Cross	5,050	3,915	.....	
Dallas	6,505	5,707	8,283	In 1873, part to Dorsey.
Desha	8,973	6,125	6,459	In 1871, part to Lincoln; in 1879, parts from Chicot and Lincoln.
Dorsey	8,370	.....	.....	In 1873, from parts of Dallas, Bradley, Jefferson, and Lincoln.
Drew	12,231	9,960	9,078	In 1871, part to Lincoln.
Faulkner	12,786	.....	.....	In 1873, from parts of Conway and Pulaski.
Franklin	14,951	9,627	7,298	In 1871, part to Logan.
Fulton	6,720	4,843	4,024	In 1873, parts to Baxter and Izard.
Garland	9,028	.....	.....	In 1873, from parts of Hot Spring, Montgomery, and Saline.
Grant	6,185	3,943	.....	
Greene	7,480	7,573	5,843	In 1873, part from Randolph, part to Clay.
Hempstead	19,015	13,768	13,989	In 1871, part to Nevada; in 1873, part to Howard.
Hot Spring	7,775	5,877	5,635	In 1872, part from Clark; in 1873, part to Garland; in 1873, part from Montgomery; in 1875, part to Saline.
Howard	9,917	.....	.....	In 1873, from parts of Hempstead, Pike, Polk, and Sevier.
Independence	18,086	14,566	14,307	In 1873, parts to Izard and Stone; in 1875, part to Sharp.
Izard	10,857	6,806	7,215	In 1873, parts to Baxter and Stone, and parts from Fulton and Independence.
Jackson	10,877	7,268	10,493	
Jefferson	22,386	15,733	14,971	In 1871, part to Lincoln; in 1873, part to Dorsey.
Johnson	11,565	9,152	7,612	In 1871, part to Logan; in 1877, part from Pope.
La Fayette	5,730	9,139	8,464	In 1875, part to Miller.

TABLE XVIII.—*Aggregate population by counties*—ARKANSAS—Continued.

Counties.	1880.	1870.	1860.	Remarks.
Lawrence	8,782	5,981	9,372	
Lee	13,288	.....	.....	In 1873, from parts of Crittenden, Monroe, Phillips, and Saint Francis.
Lincoln	9,255	.....	.....	In 1871, from parts of Arkansas, Desha, Drew, and Jefferson; in 1873, part to Dorsey; in 1879, part to Desha.
Little River	6,404	3,236	.....	
Logan	14,885	.....	.....	In 1871, from parts of Franklin, Johnson, Scott, and Yell.
Lonoke	12,146	.....	.....	In 1873, from parts of Prairie and Pulaski; in 1875, part to Pulaski.
Madison	11,455	8,231	7,740	
Marion	7,907	3,979	6,192	In 1873, part to Baxter; in 1875, part from Searcy.
Miller	.....	.....	.....	Was southwestern county of the state. The part of it north of Red river now in Indian territory; that part south of Red river now in Texas.
Miller	9,919	.....	.....	In 1875, from part of La Fayette.
Mississippi	7,332	3,633	3,895	
Monroe	9,574	8,336	5,657	In 1873, parts to Lee, Phillips, and Saint Francis.
Montgomery	5,729	2,984	3,633	In 1873, parts to Garland and Hot Spring.
Nevada	12,959	.....	.....	In 1871, from parts of Columbia, Hempstead, and Ouachita.
Newton	6,120	4,374	3,393	
Ouachita	11,758	12,975	12,936	In 1871, part to Nevada.
Perry	3,872	2,685	2,465	In 1873, part to Conway.
Phillips	21,262	15,372	14,877	In 1873, part to Lee and part from Monroe.
Pike	6,345	3,788	4,025	In 1873, part to Howard; in 1873 and 1876, parts from Clark.
Poinsett	2,192	1,720	3,621	
Polk	5,857	3,376	4,262	In 1873, part to Howard.
Pope	14,322	8,386	7,883	In 1877, part to Johnson.
Prairie	8,435	5,604	8,854	In 1873, part to Lonoke; in 1875, parts from White and Woodruff.
Pulaski	32,616	32,066	11,699	In 1873, parts to Faulkner, Lonoke, and Saline; in 1875, part to Saline; in 1875, parts from Lonoke and Saline.
Randolph	11,724	7,466	6,261	In 1873, parts to Clay and Greene.
Saint Francis	8,389	6,714	8,672	In 1873, part to Lee and parts from Crittenden and Monroe.
Saline	8,953	3,911	6,640	In 1873, part to Garland and part from Pulaski; in 1875, part to Pulaski and part from Pulaski and Hot Spring.
Scott	9,174	7,483	5,145	In 1871, part to Logan.
Searcy	7,278	5,614	5,271	In 1875, parts to Baxter, Marion, and Stone.
Sebastian	19,560	12,940	9,238	
Sevier	6,192	4,492	10,516	In 1873, part to Howard.
Sharp	9,047	5,400	.....	In 1875, part from Independence.
Stone	5,089	.....	.....	In 1873, from parts of Independence, Izard, Searcy, and Van Buren.
Union	13,419	10,571	12,288	
Van Buren	9,565	5,107	5,357	In 1873, part to Stone.
Washington	23,844	17,266	14,673	
White	17,794	10,347	8,316	In 1875, part to Prairie.
Woodruff	8,646	6,891	.....	In 1873, part to Prairie.
Yell	13,852	8,048	6,333	In 1871, part to Logan.

TABLE XVIII.—*Aggregate population by counties*—KANSAS.

[Organized as a Territory May 30, 1854; admitted as a State January 29, 1861.]

Counties.	1880.	1870.	1860.	Remarks.
The State	996,096	364,399	107,206	
Allen	11,303	7,022	3,682	
Anderson	9,057	5,220	2,400	
Arapahoe	3			In 1873 formed from original territory, unorganized.
Atchison	26,668	15,507	7,729	
Barbour	2,661			Formed prior to, but not separately returned in, 1870. Organized and parts from Harper and Pratt in 1873.
Barton	10,318	2		Organized in 1872.
Bourbon	19,591	15,076	6,101	
Breckenridge			3,197	
Brown	12,817	6,823	2,607	
Buffalo	191			In 1873 formed from original territory; unorganized.
Butler	18,586	3,035	437	
Chase	6,081	1,975	808	
Chautauqua	11,072			In 1875 formed and organized from part of Howard.
Cherokee	21,905	11,038		
Cheyenne	37			In 1873 formed from original territory; unorganized.
Clark	163			Formed prior to, but not separately returned in, 1870. Part from Ford in 1873; unorganized.
Clay	12,320	2,942	163	
Cloud	15,343	2,323		
Coffey	11,438	6,201	2,842	
Comanche	372			In 1875 formed from part of Kiowa; unorganized.
Cowley	21,538	1,175		
Crawford	16,851	8,160		
Davis	6,994	5,526	1,163	In 1873 and 1875, parts from Riley.
Decatur	4,180			In 1873 formed from original territory; organized in 1879.
Dickinson	15,251	3,043	378	
Doniphan	14,257	13,969	8,083	
Dorn			88	
Douglas	21,700	20,592	8,637	Kiowa and orig. ter. In 1875, pt. fr. Kiowa.
Edwards	2,409			Formed and organized in 1874 from parts of Kiowa and orig. ter. In 1875, pt. fr. Kiowa.
Elk	10,623			Formed and organized in 1875 from part of Howard.
Ellis	6,179	1,336		
Ellsworth	8,494	1,185		
Foote	411			In 1873 formed from original territory; unorganized.
Ford	3,122	427		Organized in 1873; part from Hodgeman, and part to Clark.
Franklin	16,797	10,385	3,030	
Godfrey			19	
Gove	1,196			Unorganized.
Graham	4,258			Organized April 1, 1880.
Grant	9			In 1873 formed from original territory; unorganized.
Greeley	3			Do. Do.
Greenwood	10,548	3,484	759	
Hamilton	168			In 1873 formed from original territory; unorganized.
Harper	4,133			Formed prior to, but not separately returned in, 1870. Part to Kingman in 1872. In 1873 organized and part to Barbour.
Harvey	11,451			Formed and organized in 1872 fr. pts. of McPherson and Sedgwick. In 1873, pt. fr. Marion.
Hodgeman	1,704			Formed prior to, but not separately returned in, 1870. In 1873, part from original territory, and part to Ford; organized in 1879.
Howard		2,794		Absorbed by Chautauqua and Elk in 1875.
Hunter			158	
Jackson	10,718	6,053	1,936	
Jefferson	15,563	12,526	4,459	
Jewell	17,475	207		Organized July 30, 1870.
Johnson	16,853	13,684	4,364	
Kansas	9			In 1873 formed from original territory; unorganized.
Kearney	159			Do. Do.
Kingman	3,713			In 1872 formed from parts of Harper and Reno; organized in 1874.
Labette	22,735	9,973		
Lane	601			In 1873 formed from original territory; unorganized.
Leavenworth	32,355	32,444	12,606	
Lincoln	8,582	516		
Linn	15,298	12,174	6,336	
Lykins			4,980	
Lyon	17,326	8,014		

TABLE XVIII.—*Aggregate population by counties*—KANSAS—Continued.

Counties.	1880.	1870.	1860.	Remarks.
McGhee			1,501	No records to account for its disappearance.
McPherson	17,143	738		In 1873, parts to Harvey and Reno.
Madison			636	
Marion	12,453	768	74	In 1873, part to Harvey.
Marshall	16,136	6,901	2,280	
Meade	296			In 1873 formed from original territory; unorganized.
Miami	17,802	11,725		
Mitchell	14,911	485		
Montgomery	18,213	7,564		
Morris	9,265	2,225	770	
Nemaha	12,462	7,339	2,436	
Neosho	15,121	10,206		
Ness	3,722	2		Organized April 14, 1880.
Norton	6,998			Organized in 1872; in 1873 name changed to Billings; in 1874 name changed back to Norton.
Osage	19,642	7,648	1,113	
Osborne	12,517	33		Organized in 1871.
Otoe			238	
Ottawa	10,307	2,127		
Pawnee	5,396	179		Organized in 1872; in 1873, parts from Rush and Stafford, and part to unorganized territory; in 1874 original territory attached.
Phillips	12,014			Organized in 1872.
Pottawatomie	16,350	7,848	1,529	
Pratt	1,890			In 1873, part to Barbour; organized in 1879.
Rawlins	1,623			In 1873 formed fr. orig. ter.; unorganized.
Reno	12,826			Formed prior to, but not separately returned in, 1870; in 1872 organized, and parts from McPherson, Rice, and Sedgwick, and part to Kingman.
Republic	14,913	1,281		
Rice	9,292	5		Organized in 1871; in 1872, part to Reno.
Riley	10,430	5,105	1,224	In 1871, part from Wabaunsee; in 1873 and 1875, parts to Davis.
Rooks	8,112			Formed prior to, but not separately returned in, 1870; organized in 1872.
Rush	5,490			Formed prior to, but not separately returned in, 1870; in 1873, part to Pawnee; organized in 1874.
Russell	7,351	156		Organized in 1872.
Saline	13,808	4,246		
Scott	43			In 1873 formed from original territory; unorganized.
Sedgwick	18,753	1,095		In 1872, parts to Harvey and Reno.
Sequoyah	568			In 1873 formed from original territory; unorganized.
Seward	5			In 1873 formed from orig. ter.; unorganized.
Shawnee	29,093	13,121	3,513	
Sheridan	1,567			In 1873 formed from orig. ter.; unorganized.
Sherman	13			Do. Do.
Smith	13,883	66		Organized in 1872.
Stafford	4,755			Formed prior to, but not separately returned in, 1870; in 1873, pt. to Pawnee; organ. in 1879.
Stanton	5			In 1873 formed from orig. ter.; unorganized.
Stevens	12			Do. Do.
Sumner	20,812	22		Organized in 1871.
Thomas	161			In 1873 formed from original territory; unorganized.
Trego	2,535	166		Organized in 1879.
Wabaunsee	8,756	3,362	1,023	In 1871, part to Riley.
Wallace	686	538		
Washington	14,910	4,081	383	
Wichita	14			In 1873 formed from original territory; unorganized.
Wilson	13,775	6,694	27	
Woodson	6,535	3,827	1,488	
Wyandotte	19,143	10,015	2,609

Wayne	166,444	119,038	75,547	
Wexford	6,815	650	.....	In 1873, part from Manistee.

MINNESOTA.

[Organized as a Territory March 3, 1849; admitted as a State May 11, 1858.]

The State	780,773	439,706	172,023	
Aitkin	366	178	2	Organized in 1873; since 1870, parts from Cass and Itasca.
Anoka	7,108	3,940	2,106	
Becker	5,218	308	386	Organized in 1871.
Beltrami	10	80	.....	Unorganized.
Benton	3,012	1,558	627	
Big Stone	3,688	24	.....	In 1876, part from Traverse; unorganized.
Blue Earth	22,889	17,302	4,803	
Breckinridge	.....	.....	79	Absorbed by Clay and Wilkin.
Brown	12,018	6,396	2,339	
Buchanan	.....	.....	26	Absorbed by Pine.
Carlton	1,230	286	51	
Carver	14,140	11,586	5,106	
Cass	486	380	150	Since 1870, part to Aitkin; unorganized.
Chippewa	5,408	1,467	.....	In 1870, part to Swift.
Chisago	7,982	4,358	1,743	
Clay	5,887	92	.....	
Cook	65	.....	.....	Formed in 1875 from part of Lake; unorganized.
Cottonwood	5,533	534	12	Organized in 1870.
Crow Wing	2,319	200	269	
Dakota	17,391	16,312	9,093	In 1871 boundary with Scott changed; in 1874, part to Ramsey.
Dodge	11,344	8,598	3,797	
Douglas	9,130	4,239	195	
Faribault	13,016	9,940	1,335	
Fillmore	28,162	24,887	13,542	
Freeborn	16,069	10,578	3,367	
Goodhue	29,651	22,618	8,977	
Grant	3,004	340	.....	Organized in 1873.
Hennepin	67,013	31,566	12,849	
Houston	16,332	14,936	6,645	
Isanti	5,063	2,035	284	
Itasca	124	96	51	Since 1870, part to Aitkin.
Jackson	4,806	1,829	181	
Kanabec	505	93	30	Unorganized.
Kandiyohi	10,159	1,760	76	In 1870 Monongalia annexed.
Kittson	905	04	1,612	In 1878 name changed from Pembina; in 1879 organized, and part to Marshall.
Lac-qui-parle	.....	145	.....	In 1870 absorbed by Swift and other counties.
Lac-qui-parle	4,891	.....	.....	In 1871, from part of Redwood.
Lake	106	135	248	In 1875, part to Cook.
Le Sueur	16,103	11,607	5,318	
Lincoln	2,945	.....	.....	Formed in 1873 from part of Lyon.
Lyon	6,257	.....	.....	Formed in 1871 from part of Redwood; in 1873, part to Lincoln.
McLeod	12,342	5,643	1,286	

TABLE XVIII.—*Aggregate population by counties*—MINNESOTA—Continued.

Counties.	1880.	1870.	1860.	Remarks.
Mankahta	.....	.....	.....	
Manomin	.....	.....	136	
Marshall	992	.....	.....	Formed in 1879 from part of Kittson.
Martin	5,249	3,867	151	
Meeker	11,739	6,090	928	In 1871, part from Renville.
Mille Lacs	1,501	1,109	73	
Monongalia	.....	3,161	350	In 1870 absorbed by Kandiyohi.
Morrison	5,875	1,681	618	
Mower	16,799	10,447	3,217	
Murray	3,604	209	29	
Nicollet	12,333	8,362	3,773	
Nobles	4,435	117	35	Organized in 1871.
Olmsted	21,543	19,793	9,524	
Otter Tail	18,675	1,968	240	Since 1870, part from Wilkin.
Pierce	.....	.....	11	Absorbed by Big Stone, Chippewa, Pope, and Stevens.
Pine	1,365	648	92	
Pipe Stone	2,092	.....	23	Organized in 1879.
Polk	11,433	.....	240	In 1870 returned as having no population; organized in 1873.
Pope	5,874	2,691	.....	
Ramsey	45,890	23,085	12,150	In 1874, part from Dakota.
Redwood	5,375	1,829	.....	Since 1870, parts to Lac-qui-parle, Lyon, and Yellow Medicine.
Renville	10,791	3,219	245	In 1871, part to Meeker.
Rice	22,481	16,083	7,543	
Rock	3,669	138	.....	Organized in 1870.
Saint Louis	4,504	4,561	406	
Scott	13,516	11,042	4,595	In 1871 boundary with Dakota changed.
Sherburne	3,855	2,050	723	
Sibley	10,637	6,725	3,609	
Stearns	21,956	14,206	4,505	Since 1870 boundary with Todd changed.
Steele	12,460	8,271	2,863	
Stevens	3,911	174	.....	Since 1870 boundary with Todd changed.
Swift	7,473	.....	.....	In 1870 detached from Chippewa and part of Lac-qui-parle attached; organized in 1871.
Todd	6,133	2,036	430	
Traverse	1,507	13	.....	In 1876, part to Big Stone.
Wabasha	18,206	15,859	7,228	
Wadena	2,080	6	.....	
Wahuata	.....	.....	.....	
Waseca	12,385	7,854	2,601	
Washington	19,563	11,809	6,123	
Watonwan	5,104	2,426	.....	
Wilkin	1,906	295	40	Since 1870, part to Otter Tail.
Winona	27,197	22,319	9,208	
Wright	18,104	9,457	3,729	
Yellow Medicine	5,884	.....	.....	Formed in 1872 from part of Redwood.

MISSISSIPPI.

[Organized as a Territory April 7, 1798; admitted as a State December 10, 1817.]

The State	1,131,597	827,922	791,305	
Adams	22,649	19,084	20,165	
Alcorn	14,272	10,431	.....	
Amite	14,004	10,973	12,336	
Attala	19,988	14,776	14,169	
Baldwin	.....	.....	.....	Now in Alabama.
Benton	11,023	.....	.....	Organized in 1870 from parts of Marshall and Tippah.
Bolivar	18,652	9,732	10,471	
Calhoun	13,492	10,561	9,518	
Carroll	17,795	21,047	22,035	In 1871, parts to Le Flore and Montgomery.
Chickasaw	17,905	19,899	16,426	In 1872, part to Clay; in 1874, part to Sumner.
Choctaw	9,036	16,988	15,722	In 1871, part to Montgomery; in 1874, part to Sumner and part from Winston.
Claiborne	16,768	13,386	15,679	
Clarke	15,021	7,505	10,771	

TABLE XVIII.—*Aggregate population by counties*—MISSISSIPPI—Continued.

Counties.	1880.	1870.	1860.	Remarks.
Clay	17,367	.....	.....	Organized as Colfax in 1872 (name changed in 1876) from parts of Chickasaw, Lowndes, Monroe, and Oktibbeha.
Coahoma	13,568	7,144	6,606	In 1877, part to Quitman.
Copiah	27,552	20,608	15,398	
Covington	5,993	4,753	4,408	
De Soto	22,924	32,021	23,336	In 1873, part to Tate.
Franklin	9,729	7,498	8,265	
Greene	3,194	2,038	2,232	
Grenada	12,071	10,571	.....

N. B.—It will be noticed in the columns of the above table devoted to the census of 1860 that the number of farms of each specified class in the United States, and in every state and territory except Nevada, when added, fail to produce the total number of farms found in a previous column of the table. These discrepancies appear without explanation on pages 221 and 222 of the volume on agriculture of the census of 1860.

at the censuses of 1880, 1870, 1860, *and* 1850.

a These figures represent the actual returns, not including, as they should, the acres of grass land mown, which were reported, under the head of unimproved land, through a failure of the enumerators to properly interpret their instructions. As a result of this error, which the office tried in vain to have rectified, the sum of the acres in the various crops in a number of counties exceeds the total acres of improved land given above.

b On farms, June 1, 1880.

TABLE XLV.—*Farm areas and farm values:* 1880—DAKOTA TERRITORY—Cont'd.

a The noticeable features of the foregoing table are: (1) The great proportional increase in the orchard products of 1880 over those of 1870 in the southern states generally, notably Alabama, Arkansas, Florida, Mississippi, and Texas, and in some of the extreme western states and territories, now undergoing rapid settlement, owing to the wide extension of fruit culture in those regions; (2) the general falling off, relatively at least, in nearly all the great fruit-growing states of the north-eastern, central, and older western sections, owing to the fact that the census year was unfavorable for an average yield.

a 17,000 bales, produced from 35,000 acres in the Indian Territory, are included in these totals.

b The acreage of Irish potatoes is given for only thirteen of the states and territories, those being selected which show the greatest percentage of land in potatoes to total improved land in farms. In a number of the states the crop is a minor one, being grown in a majority of instances in small patches as a garden product, the evident tendency of which is to make the returns of area in crop excessive (*e. g.*, through calling three-fourths or two-thirds of an acre, or even less, an acre) and the resulting average yield too small. Consequently it was not thought desirable to publish the number of acres as returned for these states.

b Number of sheep on ranches or public lands, as computed by special agent, 7,000,000, making the aggregate of sheep, exclusive of spring lambs, 42,192,074.

c Not including the following items, the result of special investigation: Texas and California fall clip of sheep reported on farms, 13,000,000 pounds; wool of other "ranch" sheep, 34,000,000 pounds; pulled wool and fleece of slaughtered sheep, 38,000,000 pounds; making an aggregate of 240,681,751 pounds.

d Sold, or sent to butter and cheese factories in 1879.

e Made on farms in 1879.
